

How to Write a Term Paper Proposal

For any student writing a research paper, the proposal is the most important step in the process. The quality of your proposal can be the deciding factor in whether the review board accepts your topic. Here are some steps to help you write a proposal for a research paper. (1500 – 1800 words)

Instructions

1. Write a catchy title. Think of something that will grab the reader's attention and keep them interested. Be as concise as possible.
2. Write the introduction. State the purpose of the study, demonstrate your knowledge of the topic and its importance, describe any major issues and key research points, pinpoint the variables and explain any boundaries of the study.
3. Provide a resource review. This section outlines all sources you have used in your research and shows your knowledge on the topic. It also gives credit to those who have done previous research on this subject and developed the framework for your research.
4. Explain the implementation of your methods. Demonstrate your knowledge on the methods you used and explain how they benefit your research.
5. Predict your results. You have no results at this stage, but it is suggested that you have some idea of the data you will collect and what kinds of procedures will be used to answer your question or hypothesis.
6. Discuss the potential impact of your results. Readers will want to know the benefits and possible drawbacks of your research.

Tips & Warnings

- Be sure to thoroughly understand the structure and functions of each part of your research paper proposal.
- Be confident in your potential results. This will improve the credibility of your paper and make readers more apt to identify with your research and approve your proposal.
- Have a third-party review and edit your proposal.

How to Make an Introduction

Effective research papers are not written in one day. It takes weeks of preparation to create a well-researched paper with a strong structure and authoritative references. Students assigned research papers are sometimes required to submit a proposal -- usually three to four pages in length -- that demonstrates the manner in which you will write the paper. This proposal is an important step because it will become the foundation upon which you write your paper. Before writing the proposal, create an outline that addresses all the main points you will cover.

Your introduction sets the tone for your research paper and provides the reader with a first impression of your writing and your thesis. Follow a few guidelines listed below and find yourself writing effective introductions that convince your readers that your thesis and research are worth their time and attention.

Grab the reader's attention with a fact, question, quote, analogy or short, interesting narrative supporting the thesis. This should set the tone for your paper while triggering the reader's interest
