

28 NOSLER

Karen Mahall Phillips

As for what's in a name—or name-sake—mention Nosler and for me Nosler's proprietary cartridge comes to mind. Always pushing the limits in innovation, after it launched the 28 Nosler in 2014 to tap into the advantages of the 6.5mm—for which it received American Hunter's NRA Golden Bullets Award for Innovation of the Year—it never took its foot off the gas. Necking up the case to 7mm to equal the 28 Nosler the following year, revealed a pattern for hunters and shooters seeking to maximize performance in a standard-length magnum action. So when the company asked hunters to welcome the 28 Nosler as "the most powerful 7mm cartridge commercially available in a standard length action today," I did... along with Nosler brass, Trophy Grade ammunition and a group of Model 48 rifles all thrown in for support.

The non-bellied 28 Nosler features the same case as the 26 Nosler with a COAL (cartridge overall length) of 3.540 inches. Because it is designed for standard-length rifle actions, hunters enjoy a shorter lock time and lighter weight, ideal when you're rushing to cut off your quarry, along with proven long-range accuracy advantages. Inherently high ballistic coefficients aid shot precision and minimize bullet drop and wind drift issues.

With Nosler riding high in the ultra-light arena with its Mini Mountain Carbine rifle, I couldn't wait to get one in 28 Nosler. I ordered mine with a match-grade 24 inch carbon fiber wrapped barrel topped with a Nosler muzzle brake just in time to take all-point Utah

bull last fall. Signed in with the 130-gr. E Tip (Expansion Tip) round at 200 yards, it was also my setup of choice in Colorado weeks later when I dropped a bull at 300 yards—with a bullet drop of a mere 3.4 inches, a velocity of 2,674 fps and 2,381 ft-lb of energy at that range. Perhaps the best testament to the 28 Nosler's performance was my young nephew Joey, who used the 28 on his first elk hunt last October. Watching him shoot good groups, seemingly unaware of felt recoil, underscored the 28 Nosler as my favorite 7mm cartridge. While Joey didn't get the right shot opportunity, elk are what dreams are made of—and fall is right around the corner.

TECHNICAL INFORMATION

More tolerant and easy going than its 6.5mm cousin, the 28 Nosler delivers extreme performance and responds well to careful load tuning. Denser burning powders and high load densities will yield great loads. Some of our best are with Norma 217 and 2633, but other propellants of similar speed give excellent results as well.
