

Student Exploration: Half-life

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. Have you ever made microwave popcorn? If so, what do you hear while the popcorn is in the microwave?

whirring then popping

2. If you turn the microwave on for two minutes, is the rate of popping always the same, or does it change? Explain.

Still the same, just maybe for a shorter time depending on the microwave and popcorn

Gizmo Warm-up

Like an unpopped kernel in the microwave, a **radioactive** atom can change at any time. Radioactive atoms change by emitting **radiation** in the form of tiny particles and/or energy. This process, called **decay**, causes the radioactive atom to change into a stable daughter atom.

The *Half-life* Gizmo™ allows you to observe and measure the decay of a radioactive substance. Be sure the sound is turned on and click **Play** (▶).

1. What do you see and hear?

Random popping both auditory and visual

Note: The clicking sound you hear comes from a **Geiger counter**, an instrument that detects the particles and energy emitted by decaying radioactive atoms.

2. What remains at the end of the decay process?

Daughter atoms

3. Is the rate of decay fastest at the beginning, middle, or end of the process?

beginning

Prior Knowledge Question A Wind Generator Student Exploration
