

Probability Unit Plan Outline

This unit plan contains 5 lessons to educate year 2 - 3 students about Probability. Print and bind this booklet for optimal usage. (All necessary PowerPoint's are on my TPT at a discounted bundle price)

	What you will need	Notes
Lesson 1	"Introduction to Probability" PowerPoint	In this lesson, you will go through the "Introduction to Probability" PowerPoint introducing the basic points of chance. This PowerPoint covers appropriate vocabulary such as - impossible, possible, certain, uncertain, likely, unlikely, equal and more. This resource also includes multiple choice questions (answers included). It is recommended for students to take notes throughout the class discussion about the PPT's topics.
Lesson 2	"Introduction to Probability - Revision" PowerPoint	In this lesson you will be revising what was learnt in the previous lesson. Use the "Introduction to Probability - Revision" PowerPoint. As a class go through the revision slides, discussing what has been learnt. After, there is a series of questions on Probability. You can go through these as a class or in small groups. Whatever is appropriate for your students.
Lesson 3	- Small Bag - Marbles - Spinner - Coin "Understanding Probability" Worksheet	This lesson puts into practice the previous points learnt from previous lessons. Students are to get into small groups (1st Group - Small bag and marbles, 2nd Group - Spinner and 3rd Group - Coin). They can rotate throughout. With each material they shall investigate and ask each other about the probability of something happening (example: What is the probability of landing on tails? There is an equal chance, 50/50, 1/2). After students are to complete the "Understanding Probability" Worksheet (answers included).
Lesson 4	"How to make a spinner" worksheet - Paper - Coloured Pencils - Ruler - Split Pin	Using the materials listed to the left students are to follow the "How to make a spinner" worksheet to make their own Spinner. After, students can use each other's spinners and generate some questions to ask other students.

Comprehensive Plan Report on the Mississippi Coastal Improvements Program (MsCIP), Part 1 of 3, House Document 111-95, January 26, 2010, 111-2, 2010 *Constructivist Strategies* Chandra Foote, Catherine Battaglia, Paul

Vermette, 2014-05-22 This book demonstrates how student centered learning activities can help your middle and high school students meet curriculum standards Its vivid and authentic examples will appeal to you if you embrace active learning and want to apply constructivist methodologies in your classroom This book explains the links between constructivism and other innovative teaching practices such as cooperative learning multiple intelligences portfolio assessment curriculum mapping culturally relevant teaching and many others Applications of these practices in classrooms are demonstrated and displayed by sample lesson and unit plans summary charts classroom management models examples of student assessments

Colville National Forest (N.F.), Kettle Range Unit Plan ,1978 Comprehensive Sampling and Sample Preparation Josep M. Bayona, Paola Dugo, X. Chris Le, Hian Kee Lee, Xing-Fang Li, Heather Lord, 2012-12-31 Comprehensive Sampling and Sample Preparation is a complete treatment of the theory and methodology of sampling in all physical phases and the theory of sample preparation for all major extraction techniques It is the perfect starting point for researchers and students to design and implement their experiments and support those experiments with quality reviewed background information In its four volumes fundamentals of sampling and sample preparation are reinforced through broad and detailed sections dealing with Biological and Medical Environmental and Forensic and Food and Beverage applications The contributions are organized to reflect the way in which analytical chemists approach a problem It is intended for a broad audience of analytical chemists both educators and practitioners of the art and can assist in the preparation of courses as well in the selection of sampling and sample preparation techniques to address the challenges at hand Above all it is designed to be helpful in learning more about these topics as well as to encourage an interest in sampling and sample preparation by outlining the present practice of the technology and by indicating research opportunities Sampling and Sample preparation is a large and well defined field in Analytical Chemistry relevant for many application areas such as medicine environmental science biochemistry pharmacology geology and food science This work covers all these aspects and will be extremely useful to researchers and students who can use it as a starting point to design and implement their experiments and for quality reviewed background information There are limited resources that Educators can use to effectively teach the fundamental aspects of modern sample preparation technology Comprehensive Sampling and Sample Preparation addresses this need but focuses on the common principles of new developments in extraction technologies rather than the differences between techniques thus facilitating a more thorough understanding Provides a complete overview of the field Not only will help to save time it will also help to make correct assessments and avoid costly mistakes in sampling in the process Sample and sample preparation are integral parts of the analytical process but are often less considered and sometimes even completely

disregarded in the available literature To fill this gap leading scientists have contributed 130 chapters organized in 4 volumes covering all modern aspects of sampling and liquid solid phase and membrane extractions as well as the challenges associated with different types of matrices in relevant application areas
