Teaching Early Algebra through Example-Based Problem Solving Meixia Ding, 2021-04-07 Drawing on rich classroom observations of educators teaching in China and the U S this book details an innovative and effective approach to teaching algebra at the elementary level namely teaching through example based problem solving TEPS Recognizing young children s particular cognitive and developmental capabilities this book powerfully argues for the importance of infusing algebraic thinking into early grade mathematics teaching and illustrates how this has been achieved by teachers in U S and Chinese contexts Documenting best practice and students responses to example based instruction the text demonstrates that this TEPS approach which involves the use of worked examples representations and deep questions helps students learn and master fundamental mathematical ideas making it highly effective in developing algebraic readiness and mathematical understanding This text will benefit post graduate students researchers and academics in the fields of mathematics STEM and elementary education as well as algebra research more broadly Those interested in teacher education classroom practice and developmental and cognitive psychology will also find this volume of interest

Affect and Mathematical Problem Solving Douglas B. McLeod, Verna M. Adams, 2012-12-06 Research on cognitive aspects of mathematical problem solving has made great progress in recent years but the relationship of affective factors to problem solving performance has been a neglected research area The purpose of *Affect and Mathematical Problem Solving A New Perspective* is to show how the theories and methods of cognitive science can be extended to include the role of affect in mathematical problem solving The book presents Mandler s theory of emotion and explores its implications for the learning and teaching of mathematical problem solving Also leading researchers from mathematics education and psychology report how they have integrated affect into their own cognitive research The studies focus on metacognitive processes aesthetic influences on expert problem solvers teacher decision making technology and teaching problem solving and beliefs about mathematics The results suggest how emotional factors like anxiety frustration joy and satisfaction can help or hinder performance in problem solving

Essential Actions for Academic Writing Nigel A. Caplan,Ann Johns,2022-03-09 Combines genre research proven pedagogical practices and short readings to help students develop their rhetorical flexibility by exploring and practicing the key actions that will appear in academic assignments such as explaining summarizing synthesizing and arguing Essential Actions for Academic Writers is a writing textbook for all novice academic students undergraduate or graduate to help them understand how to write effectively throughout their academic and professional careers While these novice writers may use English as a second or additional language this book is also intended for students who have done little writing in their prior education or who are not yet confident in their academic writing Essential Actions combines genre research proven pedagogical practices and short readings to help students develop their rhetorical flexibility by exploring and practicing the key actions that will appear in academic assignments such as explaining summarizing synthesizing and arguing Part I introduces students to rhetorical situation genre register source use and a framework for understanding how to approach any new writing task The genre approach recognizes that all writing responds to a context that includes the writer s identity the reader s expectations the purpose of the text and the conventions that shape it Part II explores each essential action and provides examples of the genres and language that support it Part III leads students in combining the actions in different genres and contexts culminating in the project of writing a personal statement for a university or scholarship application

Problem-solving Strategies for Writing Linda Flower,1989

Complex Problem Solving Beyond the Psychometric Approach Wolfgang Schoppek,Joachim Funke,Magda Osman,Annette Kluge,2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred

from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained Proceedings of the Twenty-fourth Annual Conference of the Cognitive Science Society Wayne D.
