New Media and Sport Katrien Lefever, 2012-10-04 During the past decade the media

landscape and the coverage of sports events have changed fundamentally Sports fans can consume the sports content of their choice on the platform they prefer and at the time they want Furthermore thanks to electronic devices and Internet content can now be created and distributed by every sports fan As a result it is argued that media regulation which traditionally contains rules safeguarding access to information and diversity would become redundant Moreover it is sometimes proposed to leave the regulation of the broadcasting market solely to competition law This book illustrates that media law is still needed even in an era of abundance to guarantee public s access to live and full sports coverage Dealing with the impact of new media on both media and competition law this book will greatly appeal to academics and stakeholders from various disciplines such as legal and public policy political science media and communications studies journalism and European studies Additionally it contains valuable information and points of view for policy makers lawyers and international and intergovernmental organisations active in media development The book contains an up to date analysis and overview of the different competition authorities decisions and media provisions dealing with the sale acquisition and exploitation of sports broadcasting rights Katrien Lefever is Senior Legal Researcher at IBBT The Interdisciplinary Centre for Law and ICT ICRI KU Leuven Belgium The book appears in the ASSER International Sports Law Series under the editorship of Prof Dr Robert Siekmann Dr Janwillem Soek and Marco van der Harst LL M

Inside the New China Gene Ayres, 2017-07-05. China is no longer a Third World country. It is now the world's fastest growing economy. Even after the 2008 Olympics, this fact may come as a shock to many Americans who continue to think that the Chinese still march around in brown uniforms with red stars on their caps, arresting dissidents for wearing capitalist Levis. China has at last counted more than half a billion cell phone users. Indeed, the Chinese are not only the world's leading users of mobile phones but also the leading suppliers. No Chinese student goes without one, and even a donkey cart driver chatting away on a mobile is not an uncommon sight. China's educated New Generation is possibly the most highly motivated force since the post-World War II generation in America. The young people of China are the next wave of a flourishing Chinese middle class, now estimated as 13.5% of the population and expected to be 600 million strong by 2015, according to *Business Week*. These young people want to drive cars like ours, live in houses like ours, own condos near the beach, wear designer clothes, and carry cell phones, iPods, camcorders, digital cameras, and MP3 players just like Americans. Tens of millions already do. During a thirty-month stay in China between 2004 and 2007, Ayres was presented to soldiers straight out of boot camp, toasted by military generals and governors, invited to parties with local leaders as a foreign expert and dignitary, and begged to counsel dissidents and the lovelorn. He rode buses jammed with peasants hoping that they would actually be paid at the end of the month. He dickered with farmers in open markets and street vendors desperate to make ends meet. He dealt with smooth, savvy merchants in upscale department stores and debated policy with Communist Party bosses. This revised paperback edition of the author's earlier work *A Billion to One* is a vivid, intimate account of China as it is today.
