Reflect And Learn Cps Chicago:

The Course Reflection Project Nicole Schonemann, Emily Metzgar, Andrew Libby, 2015-05-01 Service learning is entering a post initiatory phase At tertiary institutions of all types and sizes service learning programs are common and service learning requirements for graduation are growing in popularity Taken together alongside continued faculty interest in effective teaching these factors have raised the visibility and popularity of service learning Now the greater need in service learning is not to prove the need for or efficacy of service learning but to turn the focus squarely back on practice Following established best practice is not enough instructors also need to reflect on how this fits within the specific context and application of each unique course and service learning partnership While there are many excellent resources that detail best practice and showcase exemplary service learning courses faculty reflection and course revision often goes unmentioned In response to the lack of attention on the role of reflection and course revision we convened groups of faculty from a variety of disciplines to reflect deeply on their courses paying specific attention to obstacles and challenges These conversations were converted to articles for this edited collection each chapter representing the process of reflection and revision and serving as a guide to develop effective practice in varied curricular contexts This text contributes to the body of literature on service learning in a unique and practical manner Faculty teaching or interested in teaching service learning classes would benefit from this text as well as university administrators and community service directors involved in service learning at a programmatic and institutional level This book should be marketed to faculty teaching disciplinary service learning classes and service learning pedagogy classes and administrative offices involved in service learning This could be a supplementary text for graduate level pedagogy courses Higher education institutional libraries would benefit from this text as well as the national and state campus compact offices

Upstream Dan Heath, 2020-03-03 Wall Street Journal Bestseller New York Times bestselling author Dan Heath explores how to prevent problems before they happen drawing on insights from hundreds of interviews with unconventional problem solvers So often in life we get stuck in a cycle of response We put out fires We deal with emergencies We stay downstream handling one problem after another but we never make our way upstream to fix the systems that caused the problems Cops chase robbers doctors treat patients with chronic illnesses and call center reps address customer complaints But many crimes chronic illnesses and customer complaints are preventable So why do our efforts skew so heavily toward reaction rather than prevention Upstream probes the psychological forces that push us downstream including problem blindness which can leave us oblivious to serious problems in our midst And Heath introduces us to the thinkers who have overcome these obstacles and scored massive victories by switching to an upstream mindset One online travel website prevented twenty million customer service calls every year by making some simple tweaks to its booking system A major urban school district cut its dropout rate in half after it figured out that it could predict which students would drop out as early as the ninth grade A European nation almost eliminated teenage alcohol and drug abuse by deliberately changing the nation's culture And one EMS system accelerated the emergency response time of its ambulances by using data to predict where 911 calls would emerge and forward deploying its ambulances to stand by in those areas Upstream delivers practical solutions for preventing problems rather than reacting to them How many problems in our lives and in society are we tolerating simply because we've forgotten that we can fix them
