

Reflection and Planning

This section supports early learning and child care educators in their reflection and planning processes. The reflection and planning guide assumes a strong, capable image of the child and family, described in the previous documents, *The Image of the Child: A Mighty Learner and Citizen and A Practice of Relationships: Your Role as an Early Learning and Child Care Educator*. Within the Alberta curriculum framework, content begins with the experiences of children and engages educators as co-learners, co-researchers and co-imagers of possibilities. In these roles, educators are encouraged to make use of a **co-inquiry** process¹ and emergent curriculum² planning in ways that notice and name what children are doing in their play, learning and development; reflect and interpret using the curriculum goals and children's dispositions to learn; and then, co-imagine possibilities with children, families and colleagues for further exploration and play. The physical and responsive environment—including time, space, materials, and participation—changes to reflect how educators make meaning of the curriculum that children are already engaged in through this emergent and reflective process.

Burke,Judith

Duncan,2014-10-30 Taking the body as a locus for discussion Rachael S Burke and Judith Duncan argue not only that implicit cultural practices shape most of the interactions taking place in early childhood curricula and pedagogy but that many of these practices often go unnoticed or unrecognized as being pedagogy Current scholars inspired by Foucault acknowledge that the body is socially and culturally produced and historically situated it is simultaneously a part of nature and society as well as a representation of the way that nature and society can be conceived Every natural symbol originating from the body

contains and conveys a social meaning and every culture selects its own meaning from the myriad of potential body symbolisms Bodies as Sites of Cultural Reflection in Early Childhood Education uses empirical examples from qualitative fieldwork conducted in New Zealand and Japan to explore these theories and discuss the ways in which children s bodies represent a central focus in teachers pedagogical discussions and create contexts for the embodiment of children s experiences in the early years Peace Research Abstracts Journal ,2006 **Reflective Practice in Nursing** Lioba Howatson-Jones,2016-02-27 Would you like to develop some strategies to manage knowledge deficits near misses and mistakes in practice Are you looking to improve your reflective writing for your portfolio essays or assignments Reflective practice enables us to make sense of and learn from the experiences we have each day and if nurtured properly can provide skills that will you come to rely on throughout your nursing career Using clear language and insightful examples scenarios and case studies the third edition of this popular and bestselling book shows you what reflection is why it is so important and how you can use it to improve your nursing practice Key features Clear and straightforward introduction to reflection directly written for nursing students and new nurses Full of activities designed to build confidence when using reflective practice Each chapter is linked to relevant NMC Standards and Essential Skills Clusters
