

SECTION
3.1**CELL THEORY**
ReinforcementCHAPTER 3
Cell Structure and Function**KEY CONCEPT** Cells are the basic unit of life.

The invention of the microscope in the late 1500s revealed to early scientists a whole new world of tiny cells. Most cells are so small that they cannot be seen without a microscope. The discoveries of scientists from the 1600s through the 1800s led to the cell theory, which is a unifying concept of biology. The **cell theory** has three major principles:

- All organisms are made of cells.
- All existing cells are produced by other living cells.
- The cell is the most basic unit of life.

All cells can be divided into two major groups: **prokaryotic cells** or **eukaryotic cells**. The main differences between the two kinds of cells are in their structure:

- Eukaryotic cells have a nucleus defined by a membrane, while prokaryotic cells have no nucleus.
- In eukaryotic cells, the DNA, or genetic information, is found in the nucleus. In prokaryotic cells, the DNA is found in the **cytoplasm**, the jellylike substance that fills both types of cells.
- Eukaryotic cells have **organelles**, structures that perform jobs for a cell. Most organelles are surrounded by membranes. Prokaryotic cells do not have organelles surrounded by membranes.

Prokaryotic cells make up organisms called prokaryotes. All prokaryotes are tiny and consist of single cells. Bacteria are prokaryotic cells. Eukaryotic cells make up eukaryotes. You are a eukaryote, as are plants and some types of single-celled organisms. All multicellular organisms, or organisms that have many cells, are eukaryotes.

1. What is the smallest, most basic unit of life?

2. Where is the DNA in a prokaryote? in a eukaryote?

3. Why would you need a microscope to see a prokaryotic organism?

4. A friend tells you he read somewhere that rotting garbage can turn into maggots, which are fly larvae, and the maggots then can grow into adult flies. What part of the cell theory could you use to refute his claim?

Reinforcement And Study Guide Section 3 Cell

Daniela Niemeyer

Reinforcement And Study Guide Section 3 Cell:

Enjoying the Beat of Expression: An Psychological Symphony within **Reinforcement And Study Guide Section 3 Cell**

In a world used by monitors and the ceaseless chatter of instantaneous interaction, the melodic splendor and mental symphony produced by the written term usually fade in to the backdrop, eclipsed by the constant sound and interruptions that permeate our lives. Nevertheless, located within the pages of **Reinforcement And Study Guide Section 3 Cell** a marvelous fictional prize overflowing with raw feelings, lies an immersive symphony waiting to be embraced. Crafted by an elegant musician of language, this captivating masterpiece conducts viewers on an emotional journey, well unraveling the concealed tunes and profound affect resonating within each cautiously crafted phrase. Within the depths of the moving evaluation, we shall discover the book is key harmonies, analyze its enthralling writing style, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
