**and Higher Education** Rebecca Bennett, Mike Kent, 2017-04-21 Since the first MOOC was launched at the University of Manitoba in 2008 this new form of the massification of higher education has been a rollercoaster ride for the university sector The New York Times famously declared 2012 to be the year of the MOOC However by 2014 the number of academic leaders who believed the model was unsustainable doubled to more than 50% While the MOOC hype has somewhat subsided the attitudes and anxieties of this peak time can still be seen influencing universities and their administrations This is the first volume that addresses Massive Open Online Courses from a post MOOC perspective We move beyond the initial hype and revolutionary promises of the peak MOOC period and take a sober look at what endures in an area that is still rapidly growing albeit without the headlines This book explores the future of the MOOC in higher education by examining what went right what went wrong and where to next for the massification of higher education and online learning and teaching The chapters in this collection address these questions from a wide variety of different backgrounds methodologies and regional perspectives They explore learner experiences the move towards course for credit innovative design transformations and implications of the MOOC in turn This book is valuable reading for students and academics interested in education eLearning globalisation and information services [Dementia, Narrative and Performance](#) Janet Gibson, 2020-09-29 Focusing mainly

on case studies from Australia and the United States of America this book considers how people with dementia represent themselves and are represented in theatre of the real productions and care home interventions assessing the extent to which the right kind of dementia story is being affirmed or challenged It argues that this type of story one of tragedy loss of personhood biomedical deficit and socio economic crisis produces dementia and the people living with it as much as biology

does It proposes two novel ideas One is that the gaze of theatre and performance offers a reframing of some of the behaviours and actions of people with dementia through which deficit views can be changed to ones of possibility The other is that conversely dementia offers productive perspectives on theatre of the real Scanning contemporary critical studies about and practices of theatre of the real performances and applied theatre interventions the book probes what it means when certain theatre of the real practices specifically verbatim and autobiographical interact with storytellers considered culturally to be unreliable narrators It also explores whether autobiographical theatre is useful in reinforcing a sense of self for those deemed no longer to have one With a focus on the relationship between stories and selves the book investigates how selves might be rethought so that they are not contingent on the production of lucid self narratives consistent language and truthful memories
