**Doing Time, Writing Lives** Patrick W. Berry, 2018 Doing Time Writing Lives offers a much needed analysis of the teaching of college writing in U S

prisons a racialized space that despite housing more than 2.2 million people remains nearly invisible to the general public. Through the examination of a college in prison program that promotes the belief that higher education in prison can reduce recidivism and improve life prospects for the incarcerated and their families, author Patrick W. Berry exposes not only incarcerated students' hopes and dreams for their futures but also their anxieties about whether education will help them. Beginning by exploring the need to move beyond narratives of hope when discussing literacy initiatives within prisons, Berry then illustrates how teachers and students frequently hold on to different beliefs about literacy and its power in the world. After discussing the possibilities and limitations of professional writing courses in prisons, the author argues that we need to pay greater attention to teachers and their motivations in prison education initiatives. Finally, he offers a case study of one formerly imprisoned student who uses writing in his current life and how this does and does not connect with what he learned in his prison education program. Combining case studies and interviews with the author's own personal experiences teaching writing in prison, *Doing Time: Writing Lives* chronicles how incarcerated students attempt to write themselves back into a society that has erased their lived histories. It challenges polarizing rhetoric often used to describe what literacy can and cannot deliver, suggesting more nuanced and ethical ways of understanding literacy and possibility in an age of mass incarceration.

**Upsetting Composition Commonplaces** Ian Barnard, 2014-10-15 In Upsetting Composition Commonplaces Ian Barnard argues that composition still retains the bulk of instructional practices that were used in the decades before poststructuralist theory discredited them While acknowledging that some of the foundational insights of

poststructuralist theory can be difficult to translate to the classroom Barnard upends several especially intransigent tenets that continue to influence the teaching of writing and how students are encouraged to understand writing Using six major principles of writing classrooms and textbooks clarity intent voice ethnography audience and objectivity Barnard looks at the implications of poststructuralist theory for pedagogy While suggesting some evocative poststructuralist pedagogical practices the author focuses on diagnosing the fault lines of composition s refusal of poststructuralism rather than on providing solutions in the form of teaching templates Upsetting Composition Commonplaces addresses the need to more effectively engage in poststructuralist concepts in composition in an accessible and engaging voice that will advance the conversation about relations between the theory and teaching of writing      Charitable Writing Richard Hughes Gibson,James Edward Beitler,2020-12-15 How might we love God and our neighbors through the task of writing This book offers a vision for expressing one s faith through writing and for understanding writing itself as a spiritual practice that cultivates virtue Drawing on authors and artists throughout the church s history we learn how we might embrace writing as an act of discipleship for today      **Conceding Composition** Ryan Skinnell,2016-09-01 First year composition became the most common course in American higher education not because it could fix underprepared student writers but because it has historically served significant institutional interests That is it can be conceded in multiple ways to help institutions solve political promotional and financial problems Conceding Composition is a wide ranging historical examination of composition s evolving institutional value in American higher education over the course of nearly a century Based on extensive archival research conducted at six American universities and using the specific cases of institutional mission regional accreditation and federal funding this study demonstrates that administrators and faculty have introduced reformed maintained threatened or eliminated composition as part of negotiations related to nondisciplinary institutional exigencies Viewing composition from this perspective author Ryan Skinnell raises new questions about why composition exists in the university how it exists and how teachers and scholars might productively reconceive first year composition in light of its institutional functions The book considers the rhetorical political organizational institutional and promotional options conceding composition opened up for institutions of higher education and considers what the first year course and the discipline might look like with composition s transience reimaged not as a barrier but as a consummate institutional value      **Writing Effective Course Assignments** Elia Shabani Mligo,2017-05-11 Non degree and undergraduate students are both inexperienced essay writers who need close guidance to become effective writers One of the puzzles which they encounter at the college and university after reporting for studies is the course assignments offered to them by their lecturers which demand them to be critical thinkers and argumentative essay writers In most colleges and universities lecturers provide to students broad questions to answer in the form of essays either in group or individual assignments How should they turn the broad assignment questions provided to them by their lecturers into specific researchable topics for essays How should they handle literature in order to obtain

valuable information to answer the provided question How should they construct an informed and convincing argument using the collected information as evidence This book concerns these and other related questions With its clear illustrations the book is designed to be a self study guide and to offer solutions to many struggling students in colleges and universities At the same time the book can be helpful for lecturers to instruct their students how to write effective course assignments in their respective courses
