Claim:
There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

Anthropologists in Arms George R. Lucas Jr.,2009-10-15 *Anthropologists in Arms* looks at the moral and ethical debates surrounding the recent development of military anthropology particularly the practice of embedding anthropologists with combat troops in Iraq and Afghanistan Lucas traces the troubled history of social scientists collaborating with national military security and intelligence organizations and shows how these complex and frequently misunderstood historical concerns contribute to the contemporary moral controversy He gives special attention to the Human Terrain Systems project

developed by the U S Army under the direction of General David Petraeus Although this project has been criticized as unethical by academic anthropologists in the U S and the U K Lucas shows that the moral status of that program is much more ambiguous than these blanket criticisms would suggest Anthropologists in Arms concludes with a call for a thorough review of HTS itself and suggests alternative strategies for providing anthropological knowledge to military forces engaged in irregular warfare knowledge that might in turn help military forces to ameliorate the suffering imposed on noncombatants while respecting the privacy security and human rights of indigenous populations
