Claim:
There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

Honored but Invisible W. Norton Grubb,2002-06-01 Based on the most extensive research on community college teaching to date this book examines the nature of teaching and the institutional forces that shape it in a variety of course settings ranging from innovative approaches to complex subjects to conventional didactic instruction Drawing on observations of and interviews with over 300 instructors and administrators this book documents the idiosyncratic instructional practices of teachers who learn to teach primarily by trial and error It argues that in order to realize their enormous potential community colleges must take greater advantage of the many institutional influences on the quality of teaching such as personnel policies instructor training and the culture established by administrators only then will they be able to successfully carry out their many roles in both mainstream education and in workforce development **Workbook**
