since 2008 and while austerity has spread over the continent it has failed to revive economies The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light even if the latter's aim has been to shift the burden of adjustment onto citizens This book explains how and why using a critical political economic perspective and focusing on the case of Ireland Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe's peripheral countries Through a systematic analysis of Ireland's main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis

Negotiating Public Services in the Congo Tom De Herdt, Kristof Titeca, 2019-06-15 The Democratic Republic of Congo DRC has been widely derided as a failed state unable to meet the basic needs of its citizens But while state infrastructure continues to decay many essential services continue to be provided at the local level often through grassroots initiatives So while for example state funding for education is almost non-existent average school enrolment remains well above average for Sub-Saharan Africa This book addresses this paradox bringing together key scholars working on public services in the DRC to elucidate the evolving nature of governance in developing

countries Its contributions encompass a wide range of public services including education justice transport and health Taking stock of what functions and why it contributes to the debate on public services in the context of real or hybrid governance beyond the state does the state still have a function or is it no longer useful and relevant Crucially how does international aid help or complicate this picture Rich in empirical detail the contributors provide a valuable work for students and scholars interested in the role played by non state actors in organizing statehood a role too often neglected in debates on post conflict reconstruction

The War Lawyers Craig Jones,2020-11-26 Over the last 20 years the world s most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers The War Lawyers examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza Drawing on interviews with military lawyers and others this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft drones and or ground forces and with what results This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence

Cooper, Hany Besada, 2016-04-15 Today's era of intense globalization has unleashed dynamic movements of people pathogens and pests that overwhelm the static territorial jurisdictions on which the governance provided by sovereign states and their formal intergovernmental institutions is based This world of movement calls for new ideas and institutions to govern people's health above all in Africa where the movements and health challenges are the most acute This book insightfully explores these challenges in ways that put the perspectives of Africans themselves at centre stage It begins with the long central and still compelling African health challenge of combating the pandemic of HIV AIDS It then examines the global governance responses by the major multilateral organizations of the World Bank and the World Trade Organization and the newer informal flexible democratically oriented ones of the Group of Eight It also addresses the compounding health challenge created by climate change to assess both its intensifying impact on Africa and how all international institutions have largely failed to link climate and health in their governance response It concludes with several recommendations about the innovative ideas and institutions that offer a way to closing the great global governance gaps and thus improving Africans' health and that of citizens beyond *Competition Law* Richard Whish, David Bailey, 2015 Definitive and clear authoritative and comprehensive the stand alone resource on competition law for students and practitioners written by the leading academics in the field This eighth edition addresses key developments including the Enterprise and Regulatory Reform Act 2013 with an increased emphasis on intellectual property
