Abstract

According to the U.S. Forest Service, public recreation is one of the four greatest threats to the health of forestland. To assess the impact of recreation trails on forestlands we sampled 112 trail segments (55 motorized, 26 non-motorized, 31 non-mechanized) in Maine and New Hampshire. We collected data at 11 random points along a trail segment (2km or 5km), continuously along the segment, and at stream crossings. On each trail segment we assessed physical trail conditions (width, cross-sectional area, occurrence of excessively muddy and rutted/eroded sections), presence of trash, and sedimentation at stream crossings. Motorized trails were significantly wider and had significantly greater cross-sectional area, more rutted sections, and more trash than both non-motorized and non-mechanized trails. However, 74% of the motorized trail data points were located on seasonal, current, and historic roads and right-of-ways. We can not determine the contribution of current trail use or non-recreational uses to the physical dimensions of motorized trails. Non-motorized and non-mechanized trails were frequently located on areas specifically established for recreation. Non-motorized trails had 17% of data points on roads and non-mechanized trails had only 9%. Non-mechanized trails had the highest density of excessively muddy sections. This is likely due to the lack of current and/or historic roads on non-mechanized trails that would have compacted and hardened the trail surface. Motorized trails are routinely maintained by mechanical equipment to prevent degradation and unsafe conditions. We found that 38% of stream crossings had no sediment inputs, 29% of crossings had trace sediment inputs, and 24% had measurable inputs (formed a sediment fan). The remaining 9% of stream crossings had catastrophic sediment additions (significantly altered stream morphology) and included trails of all use types (non-mechanized, non-motorized, and motorized). The results of this study indicate that all trail types can contribute sediment to streams and degrade stream quality. The data also show significant differences in physical parameters among trail types but past land use, as well as current recreational use, may contribute to these differences.

1.0 Introduction

Public recreation is one of the four greatest threats to the health of forests in the U.S. (Bosworth 2007). In the Northeast, recreational uses on private and public forest lands are rapidly increasing, especially use of off-road vehicles (ORVs) (ME ATV Task Force 2003, Jensen and Guthrie 2006). As the demand for recreation increases, managers must balance the need for quality recreational experiences (Manfredo et al. 1983) with protection of environmental values (Kuss and Grafe 1985, Hendee et al. 1990). Poorly managed recreation can have a large impact on soils (Leung and Marion 2000), water quality (Rinnella and Bogan 2003), biodiversity (Cole 1995), and wildlife (Marion and Leung 2001). Degradation of trails can also impact the quality and enjoyment of recreation experiences (Conrad 1997, Marion et al. 1993). The large majority of motorized trails in the Northeast are located on private land (ME ATV Task Force 2003) and poor management of these trails may also jeopardize future recreational access to private land.

The goal of this study was to assess the environmental impact of motorized and non-motorized recreation trails in northern New England. Only a limited

number of studies have made cross-comparisons of recreational impacts among use categories (e.g., Olive and Marion 2009, Deluca et al. 1998, Wilson and Seney 1994, Whittaker 1978). This study provides baseline information about on-the-ground trail conditions and can help managers understand the environmental impact of different recreation types and begin to identify specific management activities that can be used to protect soils and water quality.

2.0 Methods

In Maine and New Hampshire we sampled 112 trail segments totaling 335 km of recreation trails (Figure 1). These trails were grouped in 3 categories: 1) motorized trails: trails with primary use of ATV or snowmobiling (n=55, 164km), 2) non-motorized trails: trails permitting hiking and mountain biking (n=26, 70 km), and 3) non-mechanized trails: trails permitting hiking only (n=31, 101 km). Proceedings Of The 2009 Northeastern Recreation Research Symposium Introduction

In the digital age, access to information has become easier than ever before. The ability to download Proceedings Of The 2009 Northeastern Recreation Research Symposium has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Proceedings Of The 2009 Northeastern Recreation Research Symposium has opened up a world of possibilities. Downloading Proceedings Of The 2009 Northeastern Recreation Research Symposium provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Proceedings Of The 2009 Northeastern Recreation Research Symposium has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Proceedings Of The 2009 Northeastern Recreation Research Symposium. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Proceedings Of The 2009 Northeastern Recreation Research Symposium. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Proceedings Of The 2009 Northeastern Recreation Research Symposium, users should also consider the

potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Proceedings Of The 2009 Northeastern Recreation Research Symposium has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
