Urban Interstices: The Aesthetics and the Politics of the In-between Andrea Mubi Brighenti, 2016-02-11 Bringing together a team of international scholars with an interest in urban transformations spatial justice and territoriality this volume questions how the interstice is related to the emerging processes of partitioning enclave making and zoning showing how in between spaces are intimately related to larger flows networks territories and boundaries Illustrated with a range of case studies from places such as the US Quebec the UK Italy Gaza Iraq India and South east Asia the volume analyses the place and function of interstitial locales in both a disciplined urban space and a disordered space conceptualized through the notions of excess danger and threat Warning not to romanticize the interstice the book invites us to study it as not simply a place but also a set of phenomena events and social interactions How are interstices perceived and represented What is the politics of visibility that is applied to them How to capture their peculiar rhythms speeds and affects On the one hand interstices open up venues for informality improvisation challenge and bricolage playful as well as angry statements on the neoliberal city and enhanced urban inequalities On the other hand they also represent a crucial site of governance even governance by withdrawal and urban management where an array of techniques ranging from military
