Science and Football A. Mark Williams, 2023-05-22 This book presents a state of the art overview of the science

underpinning talent identification and development in the world's most popular sport. It covers a broad range of topics that span the various sub-disciplines of sports science with contributions from some of the foremost scientists and applied practitioners globally. The chapters provide readers with a comprehensive insight into how sport science is helping practitioners to create more evidence-based approaches when attempting to identify and develop future generations of elite players rather than relying on tradition and precedence. This book dispels some of the myths involved in talent identification and highlights how science is playing an ever-increasing role in guiding and shaping the practices used at the most renowned professional clubs across the globe. It is a must-read for anyone involved in the game at any level, including sports scientists, medical staff, coaches, and administrators. This book was originally published as a special issue of the *Journal of Sports Sciences*. *Sport Fans* Daniel L. Wann, Jeffrey D. James, Cody T. Havard, Elizabeth B. Delia, 2025-07-31 Sports and the fans that follow them are everywhere. The third edition of *Sport Fans: The Psychology and Social Impact of Fandom* examines the affective, behavioral, and cognitive reactions of fans to better comprehend how sport impacts individual fans and society as a whole. Using up-to-date research and theory from multiple disciplines, including psychology, sociology, marketing, history, and religious studies, this textbook provides a deeper understanding of topics such as the pervasiveness of sport fandom in society, common demographic and personality characteristics of fans, how fandom can provide a sense of belonging, uniqueness, and of meaning in life, the process of becoming a sport fan, sport fan consumption, and the future of sport and the fan experience. Thoroughly updated throughout, this new edition includes new chapters on rivalry between fandoms and needs met by fandom, increased coverage of fandom for women's sports and fans, additional sections on how fans react to the emotions of athletes, sport fandom as a platform for social change, attachments to specific sports, spectators at youth sporting events, and local versus nonlocal sports. Expanded coverage of research on other targets of identification and what we can learn from this about sport fandom. Expertly combining a rigorous level of empirical research and theory in an engaging, accessible format, *Sport Fans* remains the essential text on sport fan behavior. *Deep Learning Approaches to Text Production* Shashi Narayan, Claire Gardent, 2022-06-01 Text production has many applications. It is used, for instance, to generate dialogue turns from dialogue moves, verbalise the content of knowledge bases, or generate English sentences from rich linguistic representations such as dependency trees or abstract meaning representations. Text production is also at work in text-to-text transformations such as sentence compression, sentence fusion, paraphrasing, sentence or text simplification, and text summarisation. This book offers an overview of the fundamentals of neural models for text production. In particular, we elaborate on three main aspects of neural approaches to text production: how sequential decoders learn to generate adequate text, how encoders learn to produce better input representations, and how neural generators account for task-specific objectives. Indeed, each text production task raises a slightly different challenge, e.g., how to take the dialogue context into account when producing a dialogue turn, how to detect and merge relevant information when summarising a text, or how to

produce a well formed text that correctly captures the information contained in some input data in the case of data to text generation We outline the constraints specific to some of these tasks and examine how existing neural models account for them More generally this book considers text to text meaning to text and data to text transformations It aims to provide the audience with a basic knowledge of neural approaches to text production and a roadmap to get them started with the related work The book is mainly targeted at researchers graduate students and industrials interested in text production from different forms of inputs SRDS Consumer Magazine Advertising Source ,1998-04 **Daily Graphic** Yaw
