

Personal Reflection On Practicing A Clinical Skill Nursing Essay

This essay will discuss a clinical skill in which I have become competent in practicing. I will use a reflective model to discuss how I have achieved the necessary level of competence in my nurse training programme. The reflective model I have chosen to use is Gibbs model (Gibbs 1988). Gibbs model of reflection incorporates the following: description, feelings, evaluation, analysis, conclusion and an action plan (Gibbs 1988). The model will be applied to the essay to facilitate critical thought, relating theory to practice where the model allows. Discussion will include the knowledge underpinning practice and the evidence base for the clinical skill. A conclusion to the essay will then be given which will discuss my reflection skills, acknowledge my competence and show my personal and professional development.

The clinical skill I have chosen to reflect on within this essay is the administration of Intramuscular (IM) injections. I have chosen this as within my first clinical placement this was a widely used method of drug administration and I became involved in the process of IM injections. I therefore researched the topic of IM injections and my knowledge within this area developed.

The first stage of Gibbs (1988) model of reflection requires a description of events. I was asked to administer a drug to a patient via IM injection. I had observed this clinical skill on a variety of occasions and had previously administered an IM injection under supervision. On this occasion I was being observed by two qualified nurses, one of which was my mentor. The drug had been drawn up and was ready to be administered and the patient consented to have a student administer the injection. My mentor was talking me through the procedure step by step and informed me that I should use an alcohol wipe to cleanse the injection site, when the other nurse interrupted and said that this was not necessary. This was in front of the patient, who then requested that the alcohol wipe was omitted as on previous occasions this had caused a stinging sensation. My mentor said that this was acceptable and I continued to administer the injection, omitting the use of the alcohol wipe. On the previous occasions when I had administered IM injections I had not cleansed the site and had never been instructed to adopt this practice.

I am now going to enter into the second stage of Gibbs (1988) model of reflection, which is a discussion about my thoughts and feelings. I was aware of being under the supervision of two qualified nurses and this made me feel very nervous and self conscious. Once my mentor questioned my practice, concerning skin cleansing, I became even more aware of feeling nervous and under pressure. The patient was present and I did not want the patient to feel that I did not know what I was doing. I thought that as I had been observed carrying out this clinical procedure on many other occasions then my practice must have been seen to be correct. I was now feeling very confused about the use of alcohol wipes in the administration of IM injection. I was also concerned that the practice of the qualified nurses was so inconsistent, which led me to evaluate the whole process.
