Criminal Trajectories David M. Day, Margit Wiesner, 2019-07-23 Winner 2020 DLC Outstanding Contribution Award given by the American Society of Criminology An exploration of criminal trajectories placing them in a developmental context Over the past several years notions of developmental trajectories particularly criminal trajectories have taken hold as important areas of investigation for researchers interested in the longitudinal study of crime This accessible volume presents the first full length overview of criminal trajectories as a concept and methodology and makes the case for a developmental approach to the topic The volume shows how a developmental perspective is important from a practical standpoint helping to inform the design of prevention and early intervention programs to forestall the onset of antisocial and criminal activity particularly when it begins in childhood Crime in this view does not suit a one size fits all model There are different types of criminals who develop as the result of different types of developmental factors and experiences By considering what risk factors may set the stage for later crimes in certain circumstances the authors argue that we may be able to intervene at any point along the life course and if addressed early enough prevent criminal behavior from taking root Criminal Trajectories offers a

Storytelling in Early Childhood Teresa Cremin, Rosie Flewitt, Ben Mardell, Joan Swann, 2016-12-08 Storytelling in Early Childhood is a captivating book which explores the multiple dimensions of storytelling and story acting and shows how they enrich language and literacy learning in the early years. Foregrounding the power of children's own stories in the early and primary years, it provides evidence that storytelling and story acting a pedagogic approach first developed by Vivian Gussin Paley affords rich opportunities to foster learning within a play-based and language-rich curriculum. The book explores a number of themes and topics including the role of imaginary play and its dynamic relationship to narrative; how socially situated symbolic actions enrich the emotional, cognitive and social development of children; how the interrelated practices of storytelling and dramatisation enhance language and literacy learning and contribute to an inclusive classroom culture; the challenges practitioners face in aligning their understanding of child literacy and learning with a narrow mandated curriculum which focuses on measurable outcomes. Driven by an international approach and based on new empirical studies, this volume further advances the field offering new theoretical and practical analyses of storytelling and story acting from complementary disciplinary perspectives. This book is a potent and engaging read for anyone intrigued by Paley's storytelling and story acting curriculum as well as those practitioners and students with a vested interest in early years literacy and language learning. With contributions from Vivian Gussin Paley, Patricia Patsy Cooper, Dorothy Faulkner, Natalia Kucirkova, Gillian Dowley McNamee and Ageliki Nicolopoulou.
