## **Rome 2013 Guide:**

**Rome and The Guidebook Tradition** Anna Blennow, Stefano Fogelberg Rota, 2019-04-01 To this day no comprehensive academic study of the development of guidebooks to Rome over time has been performed This book treats the history of guidebooks to Rome from the Middle Ages up to the early twentieth century It is based on the results of the interdisciplinary research project Topos and Topography led by Anna Blennow and Stefano Fogelberg Rota From the case studies performed within the project it becomes evident that the guidebook as a phenomenon was formed in Rome during the later Middle Ages and early Renaissance The elements and rhetorical strategies of guidebooks over time have shown to be surprisingly uniform with three important points of development a turn towards a more user friendly structure from the seventeenth century and onward the so called Baedeker effect in the mid nineteenth century and the introduction of a personalized guiding voice in the first half of the twentieth century Thus the guidebook tradition is an unusually consistent literary oeuvre which also forms a warranty for the authority of every new guidebook In this respect the guidebook tradition is intimately associated with the city of Rome with which it shares a constantly renovating yet eternally fixed nature **The Rough Guide to Rome**

**Strengthening civic spaces in spatial planning processes** Food and Agriculture Organization of the United Nations, 2020-08-01 Decisions over tenure who gets access to land fisheries and forests for how long and under what conditions have important implications for people's livelihoods Spatial planning procedures can have a considerable impact on the legitimate tenure rights of the respective rights holders and in the long term can affect livelihoods This technical guide on regulated spatial planning and tenure

acknowledges this link and provides guidance on the importance of recognizing legitimate tenure rights in spatial planning processes Strengthening civic spaces in spatial planning processes focuses on the practical challenges of implementing spatial planning objectives and considering peoples tenure over land fisheries and forests Given the focus on vulnerable and marginalized communities in the Guidelines a human rights based approach to spatial planning is required which sees individuals and communities as rights holders and the state as a duty bearer that has committed to uphold human rights Access to information meaningful participation accountability and access to justice are essential elements in a human rights based approach to spatial planning and are pivotal for spatial planning processes that are in line with the principles of the Guidelines Therefore the strategies presented in this technical guide seek to strengthen these elements **Routledge**

**Handbook of Food and Nutrition Security** Bill Pritchard,Rodomiro Ortiz,Meera Shekar,2016-03-31 The concept of food and nutrition security has evolved and risen to the top of the international policy agenda over the last decade Yet it is a complex and multi faceted issue requiring a broad and inter disciplinary perspective for full understanding This Handbook represents the most comprehensive compilation of our current knowledge of food and nutrition security from a global perspective It is organized to reflect the wide scope of the contents its four sections corresponding to the accepted current definitional frameworks prevailing in the work of multilateral agencies and mainstream scholarship The first section addresses the struggles and progression of ideas and debates about the subject in recent years The other sections focus on three key themes how food has been is and should be made available including by improvements in agricultural productivity the ways in which politico economic and social arenas have shaped access to food and the effects of food and nutrition systems in addressing human health known as food utilisation Overall the volume synthesizes a vast field of information drawn from agriculture soil science climatology economics sociology human and physical geography the nutrition and health sciences environmental science and development studies **Extraterritorial investments in agriculture in Africa: the perspectives of China and South Africa** Food and Agriculture Organization of the United Nations ,2020-11-30 The 2008 global food price crisis and the resurgence of food prices in 2010 2011 caused both widespread concern and expectations On the one hand countries whose food supply depends on procuring food from international markets saw food price spikes as threats to their national food security On the other hand investors saw in these price spikes an opportunity to make profitable investments in agriculture Either as threat or opportunity food price spikes raised interest in Africa whose lands are fertile and have unrealised potential Concerns of a possible land acquisitions in Africa and in particular the impacts of Large Scale Land Based Investments in Agriculture LSLBIA on local communities became prominent policy and academic themes Unfortunately quantifying the phenomenon has proved hard due to the difficulty of finding empirical evidence As a result debates are either theoretical or based on anecdotal evidence This publication thus explores a different path and explores the reasons why entities from China and South Africa were interested in investing in African agriculture This publication

examines the reasons why investors were interested in Africa and the relationship that these bear to The Voluntary Guidelines on the Responsible Governance of Tenure of Land Fisheries and Forests in the Context of National Food Security the Voluntary Guidelines or VGGT While primarily aimed at governments the VGGT also contain important provisions that are applicable to the private sector They focus on helping investors pursue their projects in ways that recognise and respect legitimate tenure rights and human rights In addition the VGGT also contain provisions and encourages good practices for responsible investment in land forests and fisheries The VGGT are a valuable tool for helping investors minimise risk while also safeguarding the rights of local communities China and South Africa represent important sources of LSLBIA in Africa although the bulk of such investment comes from western countries Their investment may intensify in the future for a variety of reasons First China has the third largest land area in the world but its expansion through additional land use is limited Second the dual agricultural economy of South Africa is preventing commercial farming located in well endowed areas from expanding into remote resource poor areas where small scale subsistence based production is prevalent This publication assesses the extent to which selected investors from China and South Africa and the governments of those countries have adopted the best practices represented by the VGGT in relation to LSLBIA in [Guidelines for sustainable large-scale land deals in Africa](#) Food and Agriculture Organization of the United Nations,2018-08-09 Over the last few years agribusinesses investment funds and government agencies have demonstrated a growing interest in acquiring large portions of land mostly in developing countries and particularly in sub Saharan Africa In the host countries investors and government see these acquisitions as opportunities to attract foreign investment that will enhance food and energy security and stimulate socio economic development Analysing a number of these deals in Africa suggests that these objectives are usually not attained and that their sustainability appears to be uncertain

**Guidelines on irrigation investment projects** Food and Agriculture Organization of the United Nations,2019-04-15 Irrigation has been and will continue to be an agricultural and rural investment priority Development of the irrigation sector faces multiple challenges including water scarcity and degradation competition over shared resources and the impact of climate change Innovations are needed to address these challenges as well as emerging needs and to promote productive equitable and sustainable water management These guidelines produced by an inter agency team highlight experiences and lessons learned from global irrigation investment operations They introduce innovative approaches tools and references and provide practical guidance on how to incorporate or apply them at each stage of the investment project cycle The guidelines will be a useful resource for national and international professionals involved in irrigation investment operations

**Water use in livestock production systems and supply chains. Guidelines for assessment** Food and Agriculture Organization of the United Nations,2019-08-14 The Technical Advisory Group TAG for Water Use Assessment composed by 30 international experts has developed guidelines on water footprinting for livestock supply chains The mandate of the Water TAG was to provide recommendations to monitor the

environmental performance of feed and livestock supply chains over time so that progress towards improvement targets can be measured apply the guidelines for feed and water demand of small ruminants poultry large ruminants and pig supply chains build on and go beyond the existing FAO LEAP guidelines and pursue alignment with relevant International Organization for Standardization ISO standards specifically ISO 14040 ISO 14044 ISO 2006b and 2006a and ISO 14046 ISO 2014 The guidelines on water use assessment include the impact assessment the assessment of the environmental performance related to water use of a livestock related system by assessing potential environmental impacts of blue water consumption following the water scarcity footprint according to the framework provided by ISO 14046 ISO 2014 and the assessment of the system s productivity of green and blue water The guidelines are thus intended to support the optimization of use of water resources and the identification of opportunities to decrease the potential impacts of water use in livestock production The Water TAG guidance is relevant for livestock production systems including feed production from croplands and grasslands and production and processing of livestock products cradle to gate It addresses all livestock production systems and livestock species considered in existing LEAP animal guidelines poultry pig small ruminant and large ruminant supply chains
