Stranded Assets Ben Caldecott, 2019-12-16 The topic of stranded assets created by environment related risk factors has risen up the agenda dramatically influencing many pressing topics in relation to global environmental change For example how best to manage the exposure of investments to environment related risks so that financial institutions can avoid stranded assets the financial stability implications of stranded assets and what this means for macroprudential regulation microprudential regulation and financial conduct reducing the negative consequences of stranded assets by finding ways to address unemployment lost profits and reduced tax income internalising the risk of stranded assets in corporate strategy and decision making particularly in carbon intensive sectors susceptible to the effects of societal action on climate change underpinning arguments by civil society campaigns attempting to secure rapid decarbonisation to reduce the scale of anthropogenic climate change and designing decarbonisation plans developed by governments as well as companies and investors Taken as a whole this book provides some of the latest thinking on how stranded assets are relevant to investor strategy and decision making as well as those seeking to understand and influence

financial institutions This book was originally published as a special issue of the Journal of Sustainable Finance and Investment

The Lived Experience of Climate Change Dina Abbott, Gordon Wilson, 2015-04-22 This book explores the idea that daily lived experiences of climate change are a crucial missing link in our knowledge that contrasts with scientific understandings of this global problem It argues that both kinds of knowledge are limiting the sciences by their disciplines and lived experiences by the boundaries of everyday lives Therefore each group needs to engage the other in order to enrich and expand understanding of climate change and what to do about it Complemented by a rich collection of examples and case studies this book proposes a novel way of generating and analysing knowledge about climate change and how it may be used The reader is introduced to new insights where the book Provides a framework that explains the variety of simultaneous co existing and often contradictory perspectives on climate change Reclaims everyday experiential knowledge as crucial for meeting global challenges such as climate change Overcomes the science citizen dichotomy and leads to new ways of examining public engagement with science Scientists are also human beings with lived experiences that filter their scientific findings into knowledge and actions Develops a public action theory of knowledge as a tool for exploring how decisions on climate policy and intervention are reached and enacted While scientists physical and social seek to explain climate change and its impacts millions of people throughout the world experience it personally in their daily lives The experience might be bad as during extreme weather engender hostility when governments attempt mitigation and sometimes it is benign This book seeks to understand the complex often contradictory knowledge dynamics that inform the climate change debate and is written clearly for a broad audience including lecturers students practitioners and activists indeed anyone who wishes to gain further insight into this far reaching issue

Successful Grant Proposals in Science, Technology, and Medicine Sandra Oster, Paul Cordo, 2015-03-19 There are many resources on grant writing in science technology and medicine but most do not provide the practical advice needed to write the narratives of grant proposals Designed to help novice and experienced investigators write compelling narratives and acquire research funding this is a detailed guide to the content organisation layout phrasing and scientific argumentation of narratives The authors draw on more than twenty years of research and analysis of grant proposals having worked extensively with investigators at different levels from pre doctoral students to senior scientists They have used this experience to design a framework for scientific writing that you can apply directly to narratives The guidelines and advice offered are applicable across many funding agencies including the NIH and NSF Featuring many real life examples the book covers a range of topics from organisational alternatives to best practices in grammar and editing overview visuals and working with contributors

Climate Change Action and the Responsibility to Protect Ben L. Parr, 2023-11-29 This book brings together two important fields in the study of international politics and policy climate change adaptation and mitigation climate action and the Responsibility to Protect R2P Both have attracted strong scholarly attention in each of their respective research silos but there is yet to be a strong research push that explores the

relationship between the two Filling this gap Ben L Parr argues that the climate action and the R2P agendas share a common goal to protect vulnerable human populations from large scale harm To substantiate this argument Parr reveals where the historical conceptual and operational parallels exist between the two agendas and where and when researchers and practitioners from both camps might work together in practice to achieve their common goal in the challenging years ahead Notably the book builds on recent efforts by Western governments in the UK US and EU to integrate climate action policies into conflict prevention and response policies To achieve this the volume situates a variety of climate action policies alongside the 46 policy options found in the R2P operational framework commonly known as the R2P toolbox across its prevention reaction and rebuilding phases Climate Change Action and the Responsibility to Protect will be of significant interest to policy orientated students and scholars those working at the academic policy interface in the NGO community as well as those working in government and international organisations

Goulart,2024-08-15 This book provides a comprehensive description of the situational and linguistic characteristics of undergraduate student writing considering both assignment type and discipline Drawing on a corpus of more than 900 undergraduate student assignments from four disciplinary groups Arts and Humanities Social Sciences Physical Sciences and Life Sciences the book combines corpus based analyses of linguistic features with analyses of communicative purposes and text characteristics Variation in University Writing takes a new approach to register variation by grouping assignments by their communicative purpose to argue to explain to compare to describe to narrate a personal event to give a procedural recount to give personal advice and to propose rather than register categories A multidimensional analysis provides a detailed description of the linguistic patterns of undergraduate writing The findings presented in this book will be of interest to teachers of writing instructors of English for Academic Purposes EAP and researchers of university writing **Towards an embodied science of intersubjectivity: Widening the scope of social understanding research** Ezequiel Di

Paolo,Hanne De Jaegher,2015-06-16 An important amount of research effort in psychology and neuroscience over the past decades has focused on the problem of social cognition This problem is understood as how we figure out other minds relying only on indirect manifestations of other people's intentional states which are assumed to be hidden private and internal Research on this question has mostly investigated how individual cognitive mechanisms achieve this task A shift in the internalist assumptions regarding intentional states has expanded the research focus with hypotheses that explore the role of interactive phenomena and interpersonal histories and their implications for understanding individual cognitive processes This interactive expansion of the conceptual and methodological toolkit for investigating social cognition we now propose can be followed by an expansion into wider and deeply related research questions beyond but including that of social cognition narrowly construed Our social lives are populated by different kinds of cognitive and affective phenomena that are related to but not exhausted by the question of how we figure out other minds These phenomena include acting and perceiving together verbal and non verbal engagement experiences of disconnection management of relations in a group joint meaning making intimacy trust conflict negotiation asymmetric relations material mediation of social interaction collective action contextual engagement with socio cultural norms structures and roles etc These phenomena are often characterized by a strong participation by the cognitive agent in contrast with the spectatorial stance typical of social cognition research We use the

broader notion of embodied intersubjectivity to refer to this wider set of phenomena This Research Topic aims to investigate relations between these different issues to help lay strong foundations for a science of intersubjectivity the social mind writ large To contribute to this goal we encouraged contributions in psychology neuroscience psychopathology philosophy and cognitive science that address this wider scope of intersubjectivity by extending the range of explanatory factors from purely individual to interactive from observational to participatory

From Maps to Models National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Mapping Science Committee, Board on Earth Sciences and Resources, Committee on Models of the World for the National Geospatial-Intelligence Agency, 2016-10-31 The United States faces numerous varied and evolving threats to national security including terrorism scarcity and disruption of food and water supplies extreme weather events and regional conflicts around the world Effectively managing these threats requires intelligence that not only assesses what is happening now but that also anticipates potential future threats The National Geospatial Intelligence Agency NGA is responsible for providing geospatial intelligence on other countries assessing where exactly something is what it is and why it is important in support of national security disaster response and humanitarian assistance NGA s approach today relies heavily on imagery analysis and mapping which provide an assessment of current and past conditions However augmenting that approach with a strong modeling capability would enable NGA to also anticipate and explore future outcomes A model is a simplified representation of a real world system that is used to extract explainable insights about the system predict future outcomes or explore what might happen under plausible what if scenarios Such models use data and or theory to specify inputs e g initial conditions boundary conditions and model parameters to produce an output From Maps to Models Augmenting the Nation s Geospatial Intelligence Capabilities describes the types of models and analytical methods used to understand real world systems discusses what would be required to make these models and methods useful for geospatial intelligence and identifies supporting research and development for NGA This report provides examples of models that have been used to help answer the sorts of questions NGA might ask describes how to go about a model based investigation and discusses models and methods that are relevant to NGA s mission

Extreme Hydrology and Climate Variability Assefa Melesse, Wossenu Abtew, Gabriel Senay, 2019-07-03 Extreme Hydrology and Climate Variability Monitoring Modelling Adaptation and Mitigation is a compilation of contributions by experts from around the world who discuss extreme hydrology topics from monitoring to modeling and management With extreme climatic and hydrologic events becoming so frequent this book is a critical source adding knowledge to the science of extreme hydrology Topics covered include hydrometeorology monitoring climate variability and trends hydrological variability and trends landscape dynamics droughts flood processes and extreme events management adaptation and mitigation Each of the book s chapters provide background and theoretical foundations followed

by approaches used and results of the applied studies This book will be highly used by water resource managers and extreme event researchers who are interested in understanding the processes and teleconnectivity of large scale climate dynamics and extreme events predictability simulation and intervention measures Presents datasets used and methods followed to support the findings included allowing readers to follow these steps in their own research Provides variable methodological approaches thus giving the reader multiple hydrological modeling information to use in their work Includes a variety of case studies thus making the context of the book relatable to everyday working situations for those studying extreme hydrology Discusses extreme event management including adaption and mitigation

Sustainability and the Political Economy of Welfare Max Koch,Oksana Mont,2016-04-28 Welfare is commonly conceptualized in socio economic terms of equity highlighting distributive issues within growing economies While GDP income growth and rising material standards of living are normally not questioned as priorities in welfare theories and policy making there is growing evidence that Western welfare standards are not generalizable to the rest of the planet if environmental concerns such as resource depletion or climate change are considered Sustainability and the Political Economy of Welfare raises the issue of what is required to make welfare societies ecologically sustainable Consisting of three parts this book regards the current financial economic and political crisis in welfare state institutions and addresses methodological theoretical and wider conceptual issues in integrating sustainability Furthermore this text is concerned with the main institutional obstacles to the achievement of sustainable welfare and wellbeing and how these may feasibly be overcome How can researchers assist policymakers in promoting synergy between economic social and environmental policies conducive to globally sustainable welfare systems Co authored by a variety of cross disciplinary contributors a diversity of research perspectives and methods is reflected in a unique mixture of conceptual chapters historical analysis of different societal sectors and case studies of several EU countries China and the US This book is well suited for those who are interested in and study welfare ecological economics and political economy
