Theoretical Nursing Afaf Ibrahim Meleis, 2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher

Impactor Practices, AIM and EDA for Orally Inhaled Products Terrence P. Tougas,Jolyon P. Mitchell,Svetlana A. Lyapustina,2013-04-10 The purpose of this publication is to introduce a new simpler and more effective way in which to interpret pharmaceutical aerosol particle size data from orally inhaled products OIPs Currently the compendial and regulatory requirements dictate the need for measurements by full resolution multi stage cascade impactor CI a process that is demanding for the operator time consuming prone to experimental error and challenging for method transfers from one laboratory to another Furthermore we shall show that the current practice of reducing information from mass weighted aerodynamic particle size distribution APSD measurements through the use of CI stage groupings is not the most effective decision making tool for OIP quality control QC in comparison with newly introduced mutually independent efficient data analysis EDA metrics that can be derived either from full resolution or abbreviated impactor measurements AIM
