Programming Guide for ROBOTIS MINI Chi Ngoc Thai, 2020-01-19

The MINI programmable humanoid robotic kit was released by ROBOTIS in 2014. It comes with a free Mobile App called MINI that allows beginner users to operate the MINI through its pre-programmed motions. But the potential use for this kit in educational robotics is largely untapped due to lack of information and practicum sources for users to develop their own projects and to help them learn more about humanoid robotics programming. This book is designed with the Spiral Teaching approach for developing MINI projects using 2 main software tools: 1. ROBOTIS tools TASK MOTION and Rm PLAY700 2. EDBOT to allow the use of standard development environments such as SCRATCH 2 and PYTHON. This approach allows MINI users to assess the capabilities and constraints of these tools in the development of their existing or potential project ideas. This book has 8 chapters. Chapter 1 provides a systemic view of the MINI kit from its hardware components and software tools. Chapter 2 provides pre-assembly and post-assembly tips for the MINI kit. Chapter 3 focuses on the use of the ROBOTIS MANAGER tool. Chapter 4 provides MOTION foundational concepts such as KEY FRAME, TIME LINE, and MOTION UNIT, as well as how-to techniques to use the ROBOTIS MOTION tool. Chapter 5 is a review of the features provided in the MINI App. Chapter 6 provides the foundational knowledge in computer programming structures and techniques with the ROBOTIS TASK tool. Chapter 7 illustrates the use of the Rm PLAY700 App to access Smart Device features in a TASK program, which allow the MINI's Controller to access Multimedia Services from mobile devices. Selected features are demonstrated: Touch Areas, Text Displays, Instruments, Play Text to Speech, Speech Recognition, and Color Tracking with Mobile Video Camera. Chapter 8 assumes the reader to have some programming experiences in using SCRATCH 2 and PYTHON. It demonstrates the use of EDBOT to control two MINI robots from a single SCRATCH 2 or PYTHON program. It showcases Remote Autonomous Mixed Control applications using SCRATCH Multi Sprite and Broadcast Message features and demonstrates the
