Village Phone Replication Manual David Keogh, Tim Wood, United Nations ICT Task Force, 2005 Why is it such a challenge to provide telecommunications to rural areas High initial infrastructure investment relative low call volumes high maintenance costs due to harsh environments cash box collection needs cash security costs for coin operated phones card availability for prepaid airtime systems technical illiteracy remote locations and high transportation costs are just some of the impediments to providing rural telecommunications access This manual is based on the experiences of the Village Phone Programmes in Bangladesh and Uganda In rural villages where no telecommunications services have previously existed the programme provides cellular phones via a sustainable financing mechanism to poor entrepreneurs who use the phone to operate a business Such has been the success that over 2 000 village phone businesses are now operating in remote villages of Uganda This manual is a guideline for replicating the programme in a new country It establishes a template for creating sustainable initiatives that bring telecommunications to the poor create viable new businesses for micro entrepreneurs and expand the customer base for telecommunications companies

Disruptive Innovation in Chinese and Indian Businesses Peter Ping Li, 2013-03-12 With the rapid development of China and India as new economic powers in global competition an obvious question is whether these emerging economies are great opportunities or threats Whilst answers are bound to differ depending on one s perspective it is increasingly clear that more local firms especially local entrepreneurs from these emerging economies will play a more critical role in global competition by becoming challengers to global incumbents Indeed the fact that the majority of their populations are at the bottom of the pyramid and thus cannot afford products designed for the developed markets has made these emerging economies fertile ground for developing and applying disruptive innovations A novel mix of key attributes distinctive from those of established technologies or business models disruptive innovations are typically inferior yet affordable and good enough products or services which originate in lower end market segments but later move up to compete with those provided by incumbent firms This book sheds new light on disruptive innovations both

from and for the bottom of the pyramid in China and India from the point of view of local entrepreneurs and international firms seeking to operate their businesses there It covers both the theoretical and practical implications of disruptive innovation using conceptual frameworks alongside detailed case studies whilst also providing a comparison of conditions and strategic options in India and China Further unlike existing studies this book focuses on the neglected perspective of local challengers as the primary players and in doing so reveals the extent to which the future landscape of global competition may be shaped by disruptive innovation as well as its capacity to make the world flatter and more sustainable This unique book will be valuable to both scholars and practitioners interested in disruptive innovation and those working in the fields of Asian studies international business economics and globalization Towards Green ICT Ramjee Prasad,Shingo Ohmori,Dina

Simunic,2022-09-01 ICT is playing an increasingly important role in both business and individual s private life It has increased international interconnectedness and speed up the process of globalization But on the other side the total energy consumption by the communication and networking devices and the relevant global CO emission is increasing exponentially ICT has in many ways a vital role to play It accounts for about two percent of global CO emissions Telecommunications applications can have a direct tangible impact on lowering greenhouse gas emissions power consumption and achieve efficient recycling of equipment waste This book is the outcome of the special session on Green Communications at The 12th International Symposium on Wireless Personal Multimedia Communications WPMC held in September 09 in Sendai Japan To the best of the editors knowledge this is the first book on the Green Information and Communication Technologies ICT and can be considered a milestone and a key tool aimed at driving the industrial scientific and academic efforts of the international community to guarantee a greener future to the whole planet *Educart English Section-1 A NTA CUET UG*

Isaac Newton's 21st Century Entanglement Noel Hodson, 2020-11-01 While quietly studying prisms and light on his family's Lincolnshire farm in the plague year of 1666 Isaac Newton suddenly finds himself transported to 2020 There he meets young Archie who assumes that this curious character on a country riverbank is a random weirdo with a few marbles missing It turns out that Newton is quantumly entangled the victim of an experiment with physical laws way beyond even his own revolutionary insight He's not the only one caught in this plight Archie becomes entangled with Isaac unwittingly riding the timelines too The pair end up on the run in two different ages pursued by panicky scientists and agents of the law in the 21st century and facing potentially lethal accusations of sorcery in the 17th Can the combined talents of Newton and his modern colleagues untangle the mess The science is soundish and the story is a delight Noel Hodson's playful novel is the easiest most enjoyable introduction to quantum physics ever written

Work-based Mobile Learning Norbert Pachler, Christoph Pimmer, Judith Seipold, 2011 The increasing use of mobile devices in work contexts has the potential to alter our work and learning practices This is particularly true for knowledge workers In addressing the implications of this transformation the book offers a multi-faceted collection of different concepts and cases of mobile learning in work environments from international contexts The contributions are centred on the question of how individual users and organisations can harness mobile devices for learning and education The range of examples presented in this book demonstrates that mobile devices foster situated approaches to learning in and across work contexts The book is targeted at both practitioners trainers or managers in charge of in-company training and researchers who are interested in designing implementing or evaluating work-based mobile learning
