Ocr Computing Gcse Past Papers:

Making the History of Computing Relevant Arthur Tatnall, Tilly Blyth, Roger Johnson, 2013-12-06 This book constitutes the refereed post proceedings of the IFIP WG 9.7 International Conference on the History of Computing HC 2013 held in London UK in June 2013. The 29 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers cover a wide range of topics related to the history of computing and offer a number of different approaches to making this history relevant. These range from discussion of approaches to describing and analyzing the history through storytelling and education to description of various collections, working installations and reconstruction projects. The papers have been organized in the following topical sections: the importance of storytelling in museums; spotlight on some key collections and their future plans; thoughts on expanding the audience for computing history; spotlight on some research projects integrating history with computer science education; putting the history of computing into different contexts; celebrating nostalgia for games and its potential as Trojan horse; the importance and challenges of working installations and reconstruction stories.

Choose the right A levels Ray Le Tarouilly, 2017-11-03 Selecting the right A levels is more important than ever in helping you shape your future path, whether through securing a place at your ideal university or starting out on your chosen career. But with such a huge variety of subject options and combinations on offer, where do you begin and indeed what are the right choices? In truth, what's right is what's best for you, and any decisions you make about your future should therefore be informed and personal to you, to ensure you find the perfect match to suit your own individual interests, skills and learning style. Giving you all the knowledge you need at your fingertips to support you in making these important decisions, **Choose the Right A levels** is your one-stop source of practical information, answering key questions such as: What does the course outline look like and how is the subject assessed? What key skills does the subject draw on and develop? Which subjects are preferred or required for certain degree courses and careers? What will I need at GCSE to study the subject and how does the subject compare to GCSE? What subjects combine well together? This comprehensive and impartial guide also features comparative data on national pass rates for each subject and insightful student case studies on what did and didn't work well for others. Written by an expert Careers Adviser and laid out in a simple format for ease of use, this accessible guide is your essential aid to navigating the wide range of subject options available and making the best choices for you and your future. **GCSE OCR**

OCR GCSE 9-1 Computer Science Workbook Collins GCSE, Paul Clowrey, 2022-07-07

OCR Gcse (9-1) Computer Science S Robson, P M Heathcote, 2016-06-15

The aim of this book is to provide an accessible text for students covering each of the elements in the OCR GCSE 9-1 Computer Science specification J276. It will be invaluable both as a course text and in revision for students nearing the end of the course. It is divided into eight sections, each broken down into manageable chapters of roughly one lesson. Sections 5 and 6 of the textbook cover algorithms and programming concepts with a theoretical approach to provide students with experience of writing, tracing and debugging pseudocode solutions without the aid of a computer. These sections would complement practical programming experience. Each of the eight sections covers one of the major topics in this course, and each subtopic contains sample examination questions from past papers which can be set as homework.

OCR GCSE Computer Science, Second Edition George Rouse, Lorne Pearcey, Gavin Craddock, Ian Paget, 2020-08-03

Written by leading Computer Science teachers, this brand new textbook will guide students through the updated OCR GCSE Computer Science specification topic by topic and provide them with standalone recap and review sections, worked examples and clear explanations of complex topics. This Student Book develops computational thinking skills in line with the new Practical Programming element of Component 02. It provides differentiated material with the beyond the spec feature. It includes standalone recap and review sections at the end of each chapter, includes answers to the Knowledge Check questions to support independent learning, provides definitions of technical terms along with a glossary of words that will be needed for assessment. Looking for answers for the Student Book? They can be found at the back of the print textbook. You can now access a free set of practice questions on the Hodder Education website. Please note these questions are not endorsed by OCR and have not been subject to any OCR quality assurance processes. George Rouse, Lorne Pearcey and Gavin Craddock are highly respected and widely published authors of resources.
