Maximum Middle School Physical Education Mary Hirt, Irene Ramos, 2008 When kids take part in the activities that come from Maximum Middle School Physical Education they won't be able to wait for their next physical education class. Written and piloted by the 2003 NASPE National Middle School Physical Education Teacher of the Year, the lessons and activities provided in this comprehensive book and CD ROM package will keep middle school students interested and help you meet your daily challenges as a physical education teacher. Maximum Middle School Physical Education offers a mix of student-centered activities and lesson plans that foster affective growth, physical skills, and knowledge development. It's called maximum physical education because the book and CD ROM provide much more than just lesson plans, assessment sheets, and activities; it's a detailed guide to a joyful experience in physical education. The authors base their content on current best practices and the National Standards for Physical Education. They help you capture and keep middle schoolers' attention with activities that encompass fitness exercises, social skills, and physical skill development. With this package, you'll be able to use a wealth of fresh ideas that address the whole middle school student at this vital time of development, broaden your program's impact with the social, emotional, and personal responsibility threads woven through each lesson, and use over 150 worksheets, assessments, and other reproducibles to help you minimize prep time and stay organized. The CD ROM also contains handouts, task cards, posters, and station instructions. The book includes thumbnails of the CD ROM items so that you know when to include them in your teaching. The text also provides practical information and tested and true suggestions on promoting your program and making physical education a maximum learning experience for all involved. Maximum Middle School Physical Education will help you empower students to take responsibility for their own activity and fitness. And it will help you create an environment where your students experience maximum success, joy, and love for movement.

Student-centered Physical Education Timothy K. Smith, Nicholas G. Cestaro, 1998 Student Centered Physical Education presents over 100 fun physical activities that not only promote student fitness and skill development but also build the foundation for a physically active life. The authors' modular approach allows teachers to mix and match activities in order to achieve specific goals, creating multiple opportunities within each class period for students to succeed. Authors Timothy Smith and Nicholas Cestaro, who together have more than 50 years of teaching experience, have developed a student-centered approach to physical education to replace the outdated subject-driven approach. By focusing on the needs of the preadolescent student rather than on sports or calisthenics, this proven program challenges exclusivity, boredom, and gender bias. Their strategies and activities make physical education relevant to your students and motivate them to participate in physical activity both in the gym and after school. Part I: A Student-Centered Modular Approach helps you develop and organize your classes. You'll learn how to assemble modular lesson plans and how to increase their effectiveness using the teaching strategies presented. You'll also find a chapter on authentic assessment which discusses the use of rubrics, portfolios,

and portfolio cards Next Part II Teaching Modules provides you with easy to follow step by step directions for more than 100 fitness related activities including warm ups skill development activities team oriented activities and individual and paired activities Each activity is ready to be inserted into the modular lesson format presented in Part I In addition you ll find 10 detailed health fitness modules one for each month of the school year that will help you present and reinforce key lifestyle concepts in addition to the physical components of physical education *Teaching Middle School Physical Education* Bonnie S.
