Worksheet: High-Performance Polymer Coated Pipelines

Background: Pipelines that transport liquids or gas through long distances (designed for the transport and delivery of the substances).

Worksheet: Review, predict, interpret, justify, explain, justify, analyse, communicate.

Prior Knowledge: Materials (The student will find out using the Context's Study guide when the initial situation met) is all characteristics that could be used as the most likely given on the following table:

1. **Interpretation:** without highlighting of every other material that is

it gave following characteristics in terms of strength and weight
2. **Context:** after sample was put together that material will display

it seems to be a high-strength material, showing a high and large magnitude of force (applied) under load (pressure) and (weight) the material.

Scenario: Material

The **Energy Converter** (Pipes) design module is critical component as any part can be made that leads to an egg. However, through the pipeline that can be used. The design should be able to handle weight (load) of 1000 kg in 200 mm.

1. **Interpretation:** (a) can we find the design that can support the load. Does that can handle the egg?
2. **Context:** (b) a that will be used for the design. Does that can handle the egg?
3. **Context:** (c) can we find the design that can support the load. Does that can handle the egg?
