The Digital Closet Alexander Monea, 2023-05-02 An exploration of how heteronormative bias is deeply embedded in the internet hidden in algorithms keywords content moderation and more In *The Digital Closet* Alexander Monea argues provocatively that the internet became straight by suppressing everything that is not forcing LGBTQIA content into increasingly narrow channels rendering it invisible through opaque algorithms automated and human content moderation warped keywords and other strategies of digital overreach Monea explains how the United States thirty year war on porn has brought about the over regulation of sexual content which in turn has resulted in the censorship
