

The Politics of Improving Learning Outcomes in South Africa

PE 03

Martin Gustafsson and Nick Taylor

Abstract

Political economy and ideology are important determinants of educational development. The authors examine this in the South African context, using an approach which is in part dialogical, while paying special attention to the acquisition of foundational skills in the early grades. South Africa's apartheid legacy, and the predominance of the upper secondary school-leaving certificate, shaped the policy discourse in ways that often marginalised the question of foundational skills. Post-1994, the political urgency of providing quality schooling to the emerging black middle class could have diverted attention from improving the quality of education for the poorest segments of society, despite official policy commitments to serving the poor. Notwithstanding these limitations, South Africa has seen substantial gains in learning outcomes in the last twenty years, driven mainly by improvements among the least advantaged. Yet outcomes remain well below those of other middle income countries. Several political and non-political factors could impede further gains. Education planning capacity remains weak. The quality of teacher training at universities is considered poor. The electoral system rewards politicians who respond to popular demands, but such demands tend to focus on very visible phenomena such as school infrastructure and obtaining the Grade 12 certificate. Learning in the early grades has become more visible due to work occurring in samples or pockets of the system. How to make this visible across all primary schools through better availability of information, and better systems development capacity, and how to link information to school accountability in ways that avoid pitfalls experienced in South Africa's recent past, are politically and ideologically charged questions. Corruption has adversely affected the schooling system, most noticeably with respect to who is promoted, but the wider erosion of institutions caused by corruption undermines schooling in more insidious ways. The South African experience confirms that a more politically informed approach to education policy analysis is illuminating and necessary. The emergence of a specialist literature on the political economy of education is helpful. However, a complete treatment of politics in the education policy arena should include analysis of ideological narratives employed by contesting elites, and how these narratives almost gain 'a life of their own', independently of what their proponents may have intended.

Political Economy in a Globalized World Joergen Oerstroem Moeller, 2009 The recent global financial crisis illustrates how fragile economic globalization is and how vulnerable all global citizens are to economic events outside their own country Indeed global economics is more important for national economic growth than domestic policies Globalization and change interact and shape the economic environment for citizens and enterprises These essays represent observations made over a ten year period which attempt to analyze what is happening why it happened and the impact on global and national economic growth Readers may not find solutions or answers to all the perplexing events in the world but they will gain a better understanding of how global politics and economics work and in some cases how they should but actually do not work

Early Mathematical Economics James P. Henderson, 1996 Convinced that Ricardian concept of political economy dominant among

his contemporaries was based on unscientific doctrines and dubious moral conclusions William Whewell and his followers sought to transform scientific knowledge and to reform British education by applying mathematics to economics James P Henderson's comprehensive study argues that Whewell developed a strategy to challenge the growing dominance of the Ricardian paradigm by highlighting the errors in its deductive reasoning Whewell's views on scientific methodology moral philosophy and educational doctrine influenced several generations of prominent mathematical economists including Edward Rogers Col T Perronet Thompson John Edward Tozer Sir John William Lubbock and Dionysius Lardner Along with Richard Jones Whewell was instrumental in developing an inductive political economy based upon careful historical and statistical research This study of Whewell's contributions to mathematical economics is important reading for students and scholars of economics and political economy

NTA UGC NET Paper 1 Topic-wise 50 Solved Papers (2019 to 2004) Disha Experts, 2020-07-04 Development Economics Natalia Bracarense, Louis-Philippe Rochon, 2022-02-27 Since the inception of development economics in the post World War II period most of its proponents have prescribed the adoption of western institutions as the path for prosperity the unequivocal solution for poverty illiteracy hunger inequality and violence in the world Seventy years of attempts or at least the pretense thereof to reproduce the western model in completely different historical and cultural contexts have proven to be no more than a mirage for most Faced with this scenario why do economists insist on the ideas of development convergence and emulation of the lifestyle of western countries Is it possible to disassociate development from multidimensional instability dependency subordination and exploitation Is the current social political ecological and economic organized destabilization observed in the western countries a model to follow a desirable end of history These questions raised earlier by some fellow economists have become ever more pressing in the present context of generalized instability The book questions how ethical and professionally responsible it is for economists to continue to undiscerningly prescribe miraculous one size fits all market oriented models to solve socio economic problems everywhere The contributors of this edited volume invite the readers to consider these questions and further similar inquiries in the future The chapters in this book were originally published as a special issue of the journal Review of Political Economy

Postmodern Moments in Modern Economics David F. Ruccio, Jack Amariglio, 2016-06-28 Of all the areas of contemporary thought economics seems the most resistant to the destabilizing effects of postmodernism Yet David Ruccio and Jack Amariglio argue that one can detect within the diverse schools of thought that comprise the discipline of economics moments that defy the modernist ideas to which many economists and methodologists remain wedded This is the first book to document the existence and to explore the

implications of the postmodern moments in modern economics Ruccio and Amariglio begin with a powerful argument for the general relevance of postmodernism to contemporary economic thought They then conduct a series of case studies in six key areas of economics From the idea of the multiple self and notions of uncertainty and information through market anomalies and competing concepts of value to analytical distinctions based on gender and academic standing economics is revealed as defying the modernist frame of a singular science The authors conclude by showing how economic theory would change if the postmodern elements were allowed to flourish A work of daring analysis sure to be vigorously debated *Postmodern Moments in Modern Economics* is both accessible and relevant to all readers concerned about the modernist straightjacket that has been imposed on the way economics is thought about and practiced in the world today

Political Economy and Public Finance Stanley L. Winer, Hirofumi Shibata, 2002-01-01 There is a long standing difference amongst public economists between those who think that collective choice must be formally acknowledged and those who derive their policy recommendations from a social planning framework in which politics plays no role The purpose of this book is to contribute to a meaningful dialogue between these two groups in the belief that the future of both political economy and of normative public finance lies somewhere between the two approaches Some of the specific questions addressed in the book include does public finance need political economy Should collective choice play a role in the standard of reference used in normative public finance What is a failure in a non market or policy process And what have we learned about the theory and practice of public finance from three decades of empirical research on public choice The book also provides a practitioner's view of the political economy of redistribution
