Foundations of Constitutions Denis J. Galligan, Mila Versteeg, 2013-10-14 This volume analyses the social and political forces that influence constitutions and the process of constitution making. It combines theoretical perspectives on the social and political foundations of constitutions with a range of detailed case studies from nineteen countries. In the first part leading scholars analyse and develop a range of theoretical perspectives including constitutions as coordination devices, mission statements, contracts, products of domestic power play, transnational documents and as reflection of the will of the people. In the second part these theories are examined through in-depth case studies of the social and political foundations of constitutions in countries such as Egypt, Nigeria, Japan, Romania, Bulgaria, New Zealand, Israel, Argentina and others. The result is a multidimensional study of constitutions as social phenomena and their interaction with other social phenomena.

Avenues of Participation Diane Singerman, 2020-09-01 Intentionally excluded from formal politics in authoritarian states by reigning elites, do the common people have concrete ways of achieving community objectives? Contrary to conventional wisdom, this book demonstrates that they do. Focusing on the political life of the shawb or popular classes in Cairo, Diane Singerman shows how men and women develop creative and effective strategies to accomplish shared goals despite the dominant forces ranged against them. Starting at the household level in one densely populated neighborhood of Cairo, Singerman examines communal patterns of allocation, distribution and decision making. Combining the institutional focus of political science with the sensitivities of anthropology, she uncovers a system of informal networks supported by an informal economy that constitutes another layer of collective institutions within Egypt and allows excluded groups to pursue their interests. *Avenues of Participation* traces this informal system from its grounding in the family to its influence on the larger polity. Discussing the role of these networks in meeting fundamental needs in the community such as earning a living, reproducing the family, saving and investing money and coping with the bureaucracy, Singerman demonstrates the surprising power these excluded people wield. While the government has reduced politics to the realm of distribution to protect itself from challenges, she argues that the popular classes in Cairo, as consumers of goods and services, have turned exploiting the government into a fine art.

Islamic Bioethics: Problems and Perspectives Dariusz Atighetchi, 2006-12-02 This book presents a critical analysis of the debate at the religious, legal and political level sparked off by the introduction of new biomedical technologies: cloning, genetics, organ transplants, IVF etc. in Muslim countries. It compares the positions of classic Muslim law and contemporary religious authorities' laws in Muslim countries, the attitudes and concrete behaviour of populations, families and individuals as well as the regulations of medical associations, bioethics committees etc. The result is a mosaic of positions which are often different, including from the point of view of ethics, but all in pursuit of legitimisation according to the Koran and the Shari'a. The work has an interdisciplinary approach drawing on law, sociology, anthropology, politics and the history of science. For this reason, it will be of interest to scholars and operators in a wide variety of disciplines and fields.

Islamic Law and Human Rights Moataz El Feghery, 2016-08-17 This book explores the

development of the Muslim Brotherhood's thinking on Islamic law and human rights and argues that the Muslim Brotherhood has exacerbated rather than solved tensions between the two in Egypt. The organisation and its scholars have drawn on hard line juristic opinions and reinvented certain concepts from Islamic traditions in ways that limit the scope of various human rights and advocate for Islamic alternatives to international human rights. The Muslim Brotherhood's practices in opposition and in power have been consistent with its literature. As an opposition party it embraced human rights language in its struggle against an authoritarian regime but advocated for broad restrictions on certain rights. However its recent and short lived experience in power provides evidence of its inclination to reinforce restrictions on religious freedom freedom of expression and association and the rights of religious minorities and to reverse previous reforms related to women's rights. The book concludes that the peaceful management of political and religious diversity in society cannot be realised under the Muslim Brotherhood's model of a Shari'a state. The study advocates for the drastic reformation of traditional Islamic law and state impartiality towards religion as an alternative to the development of a Shari'a state or exclusionary secularism. This transformation is however contingent upon significant long term political and socio cultural change and it is clear that successfully expanding human rights protection in Egypt requires not the exclusion of Islamists but their transformation. Islamists still have a large constituency and they are not the only actors who are ambivalent about human rights. Meanwhile Islamic law also appears to continue to influence Egypt's law. The book explores the prospects for certain constitutional and institutional measures to facilitate an evolutionary interpretation of Islamic law provide a baseline of human rights and gradually integrate international human rights into Egyptian law.

Genital Cutting and Transnational Sisterhood Stanlie Myrise James, Claire C. Robertson, 2002. Extrait de la couverture. This book is a much needed response to the ethnocentric and arrogant Western perceptions surrounding female genital cutting. FGC often referred to as either female genital mutilation or female circumcision but including a variety of practices of varying history severity geographical distribution and consequences. In five provocative essays the contributors to this timely volume challenge representations of FGC. In doing so they interweave a range of perspectives including history human rights law.
