Student Exploration: Populations and Samples

Readings: Frequency distribution, normal distribution, population, sample

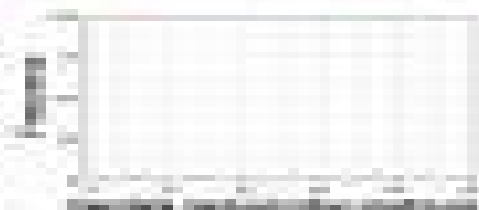

Prior Knowledge Question: (Discuss this question with your class.)

a. **Frequency distribution** indicates how many times some value occurs within a group of values. Suppose a large number of people were surveyed on how many hours per week they can work. The histogram at the right shows the frequency distribution of these results, without labeling.

b. How would you approximate shape of this distribution?

c. In the above graph at right, which value gives more the frequency distribution might give than the same people could describe the number hours working per week?

Classroom Setup

In many cases, a frequency distribution is skewed to the right or left. **Skewed** means that frequency is skewed **sample** or values of the population. This can happen with samples of people using the **Frequency Distribution** tool.

a. The histogram shows frequency for the **Number of hours per week** with frequency distribution described above. If a value appears in the data set, which frequency distribution is skewed to the right? (Left mean _____ Right mean _____)

b. About the **Simulation** spreadsheet of the tool in the **Class Page** (a) to start taking samples from population. (b) **Power** (c) when the sample size is at least 10.

i. What is the mean of each sample? (Minimum _____ Max mean _____)

ii. How many of the sample means is the population mean? _____
