BACKGROUND

The South African Navy (SAN), through its Military Skills Development System (MSDS), is offering young South African citizens an opportunity to serve in uniform on a two-year contract. The Recruits will receive military training and further functional training in their first year of service. During the second year of service they will be deployed where needed and given opportunity to apply their knowledge and develop their skills.

General Requirements:

- RSA Citizen (No dual citizenship).
- 18 – 22 years of age (successfully completed Gr 12).
- Admission Point Score (APS) of 18 and above, excl LO.
- 18 – 26 (3 years Tertiary Qualification or N6) when reporting.
- Have no criminal record or pending cases).
- Comply with medical fitness requirements for the appointment.
- No Visible tattoos (Legs, lower arm, neck and face)

Select one of the following fields of interest:

☐ COMBAT

- Combat applicants aged between 18 - 22.
- Must have completed Gr 12 with Mathematics and Physical Science with at least Level 4 for both subjects (NO Mathematical Literacy), excl LO.

☐ ENGINEERING and/or TECHNICAL

- Engineering and Technical applicants aged between 18 - 22.
- Must have completed Gr 12 with Mathematics and Physical Science with at least Level 4 for both subjects, excl LO. Mechanical Engineering, Electrical Engineering with N6 and Trade Test.

☐ DIVERS

- Divers applicants aged between 18 - 22.
- Must have completed Gr 12 with Mathematics at least Level 3 (NO Math Literacy).

☐ SUPPORT

- Support applicants aged between 18 - 22.
- Must have completed Gr 12.

Sa Navy Application For 2014:

African Navies Timothy Stapleton, 2022-11-11 This edited volume focuses on aspects of the understudied theme of African sea power including African navies and the engagement of non African navies with the continent Africa possesses 48 000 kilometers of coastline comprising 38 out of 54 of the continent's states and several strategic choke points for international shipping such as the Suez Canal the Gulf of Aden and the Cape of Good Hope Nevertheless post colonial Africa's small navies and their relations with the navies of external powers have not received much scholarly attention Focusing on Sub Saharan Africa this collection attempts to address this neglect and stimulate further research by offering original chapters related to historical and contemporary themes around Africa's navies The historical chapters cover the origin of the Tanzanian Ethiopian Nigerian and Ghana navies during the era of decolonization and the Cold War the asymmetrical naval campaign fought during the Nigerian Civil War 1967-70 and the activities of the Soviet Navy in supporting African states and movements fighting lingering colonialism and white supremacy during the 1970s and 1980s Focusing on the contemporary situation other chapters discuss the engagement of the Indian Navy with Africa the potential role of the Angolan and Mozambican navies in the Southern African Development Community SADC the transformation and development of the post apartheid South African Navy and the challenges and capabilities of African navies in the early twenty first century The book concludes by discussing the question of whether African coastal countries need navies This book will be of much interest to students of naval power strategic studies African politics and International Relations Chapters 1 2 6 and 8 of this book are available for free in Open Access at www.taylorfrancis.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *Towards Good Order at Sea* Thomas Mandrup, Francois Vre~ , 2015-03-01 The problems originating from the resultant bad order at sea can be directly felt on land when smuggling terrorism and related criminal activities operate more or less unhindered The book provides an important mapping of the challenges preventing good order at sea off the African coast and East Africa in particular Rear Admiral N Wang Commandant Royal Danish Defence College **Reforming Civil-Military Relations in New Democracies** Aurel Croissant, David Kuehn, 2017-03-20 This book addresses the challenge of reforming defense and military policy making in newly democratized nations By tracing the development of civil military relations in various new democracies from a comparative perspective it links two bodies of scholarship that thus far have remained largely separate the study of emerging or failed civilian control over armed forces on the one hand and work on the roots and causes of military effectiveness to guarantee the protection and security of citizens on the other The empirical and theoretical findings presented here will appeal to scholars of civil military relations democratization and security issues as well as to defense policy makers *Navies and Maritime Policies in the South Atlantic* Érico Duarte, Manuel Correia de Barros, 2019-02-12 This edited volume analyzes national security issues with maritime implications and specifically naval projects and postures of main South Atlantic countries Brazil Argentina Nigeria

and South Africa Additionally it provides comprehensive and multi level analysis of the interplay among national interests in the processes of demarcation of limits of the continental shelf and contention among Uruguay Chile Argentina and the United Kingdom in the Southern Atlantic and the Antarctica This book will interest scholars researchers and students in the fields of Latin American politics regional studies foreign and defense policy and maritime security *Capacity Building for Maritime Security* Christian Bueger,Timothy Edmunds,Robert McCabe,2020-10-09 This book studies recent attempts to restructure maritime security sectors through capacity building It innovates both theoretically and empirically It proposes a new framework for understanding maritime capacity building drawing on work in peacebuilding and security sector reform The framework is then applied across empirical case studies from the Western Indian Ocean WIO region written by scholars from the Global South The WIO region is a paradigmatic case to study maritime security and capacity building in action Countries in the region face the full gamut of maritime security challenges while their indigenous capacities to deal with these are often weak In consequence the region functions as an engine of innovation for maritime capacity building more widely The lessons and best practices from the region have importance consequences for addressing maritime security across the globe

Naval Powers in the Indian Ocean and the Western Pacific Howard M. Hensel,Amit Gupta,2018-05-11 A vital component of the interdependent global economy maritime transit routes are nowhere more critical than those traversing the Indian Ocean and the Western Pacific Previously areas of the Indian Ocean and Western Pacific have been viewed as separate and discrete political economic and military regions In recent years however a variety of economic political and military forces have created a new understanding of these maritime expanses as one zone of global interaction This book complements the material presented in its companion volume *Maritime Security in the Indian Ocean and the Western Pacific* by analysing the perceptions interests objectives maritime capabilities and policies of the major maritime powers operating in the Indian Ocean and the Western Pacific In addition the book also assesses the contemporary maritime challenges and opportunities that confront the global community within what is rapidly becoming recognised as an integrated zone of global interaction A valuable study for researchers and policymakers working in the fields of maritime security military security and peace studies conflict resolution and Asian affairs **Contemporary Military Geosciences in South Africa** Jacques

Bezuidenhout,Hennie Smit,2019-03-20 *Contemporary Military Geosciences in South Africa* presents the reader with chapters celebrating the scope reach and impact of themes researched by military geoscientists The first topics under investigation ranges from battlefield archaeology and battlefield tourism to military environmental management and the development of a unique South African spatial decision support system for military integrated environmental management This is followed by an in depth look at contemporary maritime factors at play in South Africa The book is concluded by an analysis of the issues surrounding military mobility software and terrain negotiability as well as a comprehensive examination of how geographic factors influence the distribution of natural radionuclides in a military area **Biostimulants for Crop Production and**

Sustainable Agriculture Mirza Hasanuzzaman, Barbara Hawrylak-Nowak, Tofazzal Islam, Masayuki Fujita, 2022-09-14

Agricultural biostimulants are a group of substances or microorganisms based on natural resources that are applied to plants or soils to improve nutrient uptake and plant growth and provide better tolerance to various stresses. Their function is to stimulate the natural processes of plants or to enrich the soil microbiome to improve plant growth, nutrition, abiotic and biotic stress tolerance, yield, and quality of crop plants. Interest in plant biostimulants has been on the rise over the past 10 years, driven by the growing interest of researchers and farmers in environmentally friendly tools for improved crop performance. Improved crop production technologies are urgently needed to meet the growing demand for food for the ever-increasing global population by addressing the impacts of changing climate on agriculture. This book is of interest to researchers in agriculture, agronomy, crop and plant science, soil science, and environmental science.

Protective Chemical Agents in the Amelioration of Plant Abiotic Stress Aryadeep Roychoudhury, Durgesh Kumar Tripathi, 2020-07-07 A guide to the chemical agents that protect plants from various environmental stressors. Protective Chemical Agents in the Amelioration of Plant Abiotic Stress offers a guide to the diverse chemical agents that have the potential to mitigate different forms of abiotic stresses in plants. Edited by two experts on the topic, the book explores the role of novel chemicals and shows how using such unique chemical agents can tackle the oxidative damages caused by environmental stresses. Exogenous application of different chemical agents or chemical priming of seeds presents opportunities for crop stress management. The use of chemical compounds as protective agents has been found to improve plant tolerance significantly in various crop and non-crop species against a range of different individually applied abiotic stresses by regulating the endogenous levels of the protective agents within plants. This important book explores the efficacy of various chemical agents to eliminate abiotic stress. Offers a groundbreaking look at the topic and reviews the most recent advances in the field. Includes information from noted authorities on the subject. Promises to benefit agriculture under stress conditions at the ground level. Written for researchers, academicians, and scientists. Protective Chemical Agents in the Amelioration of Plant Abiotic Stress details the wide range of protective chemical agents, their applications, and their intricate biochemical and molecular mechanism of action within the plant systems during adverse situations.

Disaster Risk Reduction in Agriculture Mukhtar Ahmed, Shakeel Ahmad, 2023-11-02 This book is related to disaster risk reduction in agriculture, particularly under changing climate. Climate change refers to significant long-term changes in the global climate. There is unequivocal evidence that Earth is warming at an unprecedented rate. Human activity is the principal cause. The planet's average surface temperature has risen to about 1°C since the late 19th century, and most of the warming occurred in the past 40 years. The years 2016 and 2020 are tied for the warmest year on the record. Similarly, other evidence of rapid climate change includes warming of oceans, shrinking of ice sheets, retreating glaciers, decreasing snow cover, rising of sea level, declining Arctic sea ice, increased frequency of extreme events, ocean acidification, and loss of biodiversity. Hence, climate change impacts both extreme weather

and slow onset events have impacted several sectors of the national economies and activities in particular agriculture and food production augmented by other challenges be it geopolitical cost of finance or supply chain related and in a time of increased food insecurity Without CO₂ fertilization effective adaptation and genetic improvement each degree Celsius increase in global mean temperature would on average reduce global yields of wheat by 6.0% rice by 3.2% maize by 7.4% and soybean by 3.1% Hence this book is useful as a study material to teach in the field of agriculture and climate change The book is useful for instructors and postgraduate as well as undergraduate students involved in the study of climate change The book also provide guidance to multiple stakeholders to design mitigation and adaptation efforts to climate change and ensure food security in the developing world

Plant Nanobionics Ram Prasad, 2019-09-30 *Plant Nanobionics Volume 2* continues the important discussion of nanotechnology in plants but focuses with a focus on biosynthesis and toxicity This book discusses novel approaches to biosynthesis of nanoparticles for the increase of plant production systems controlled release of agrochemicals and management of plant biotic stress Green biosynthesis of metallic nanoparticles from bee propolis artificial photosynthesis and hybrid structures are presented Although engineered nanoparticles have great potential for solving many agricultural and societal problems their consequences on the ecosystems and environment must be responsibly considered This volume aims to contribute to the limited literature on this topic through its comprehensive examination of nanoparticle toxicity on plants microbes and human health Environmental risks with recent data are discussed as well as risks associated with the transfer of nanoparticles through the food chain This volume highlights the study of a mechanistic approach and the study of nanoparticles towards nanobionics The application of polymeric materials for smart packing in the food industry and agriculture sector as well as the future of nanomaterials in detecting soil microbes for environmental remediation are also included

Plant Ionomics Vijay Pratap Singh, Manzer H. Siddiqui, 2023-03-07 *Plant Ionomics* A thoroughly up to date exploration of nutrient uptake in plants In *Plant Ionomics Sensing Signaling and Regulation* accomplished botanists and researchers Dr Vijay Singh and Dr Manzer Siddiqui deliver an up to date discussion on the sensing signaling and regulation of nutrient uptake in plants under a variety of conditions The book offers an accessible and easy to use reference for researchers with an interest in plant ionomics combining the latest research from leading laboratories around the globe The authors provide coverage of a variety of critical topics including plant and soil nutrient stoichiometry nutrient management and stress tolerance in crops and the relationship between agricultural production and nutrient applications Readers will also find A thorough introduction to nutrient regulation and abiotic stress tolerance in plants In depth discussions of nutrient uptake and transport in plants and the role of nutrients in ROS metabolism Practical explorations of nutrient and sugar signaling and associated gene networks in plants Extensive treatments of the role of nutrients in plant microbe interactions and nutrient use efficiency in plants Perfect for students researchers academics and scientists with an interest in plant nutrition *Plant Ionomics Sensing Signaling and Regulation* will

also earn a place in the libraries of professionals in the agriculture and pharmaceutical industries Bioformulations: for Sustainable Agriculture Naveen Kumar Arora, Samina Mehnaz, Raffaella Balestrini, 2016-06-06 More than a century has passed since the first bioformulations were introduced to the market But there is still much to be done explored and developed Though bioformulations offer green alternatives and are important for sustainable agriculture they make up only a small fraction of the total additions used to enhance crop yields or protect them from pests There is a great need to develop bioformulations that can promote confidence among end users accordingly it is imperative that bioformulations to replace chemicals be reliable and overcome the shortcomings of the past Bioformulations for Sustainable Agriculture discusses all the issues related to the current limitations and future development of bioformulations It examines in detail those bioformulations that include biofertilizers and biopesticides also commonly known as bioinoculants presenting a global picture of their development Further chapters address diverse microbes that are already being or could be used as bioformulations The book also discusses the techniques tools and other additions required to establish bioformulations as trustworthy and global solutions It assesses the types of bioformulations currently available on the market while also considering the future roles of bioformulations including the reclamation of marginal and polluted soils Further it discusses the current legislation and much needed amendments Overall the book provides a comprehensive outlook on the status quo of bioformulations and the future approaches needed to improve them and achieve sustainable agriculture and food security without sacrificing the quality of soils This will be extremely important in offering chemical free foods and a better future for generations to come Crop Production and Global Environmental Issues Khalid Rehman Hakeem, 2015-12-08 Meeting the world's food security challenge will require a multi national collaborative effort to integrate the best research from science engineering and socioeconomics so that technological advances can bring benefits where they are most needed The present book covers the effect of major environmental problems on crop production and how to cope with these issues for sustainable agriculture and improvements of crops The world's population is predicted to hit 9.6 Billion by 2050 up from today's total of nearly 7.3 Billion and with it food demand is predicted to increase substantially The post war second agricultural revolution in developed countries and the green revolution in developing nations in the mid 1960s converted agricultural practices and elevated crop yields spectacularly but the outcome is levelling off and will not meet projected demand Simultaneously crop production is affected by many other factors including industrial pollution overuse of fertilizers and insecticides heavy metal and radiation stresses etc It has been noted that many pests are becoming resistant to insecticides Estimates vary but around 25% of crops can be lost to pests and diseases Climate change associated with agriculture is also a global issue Agriculture is a significant contributor to greenhouse gases and is estimated to account for 10-12% of total greenhouse gas GHG emissions Many of the issues highlighted are global problems and are addressed thoroughly in this work Sustainable Utilization of Natural Resources Prasenjit Mondal, Ajay K. Dalai, 2017-03-16 Increased research is going on to explore the new cleaner

options for the utilization of natural resources This book aims to provide the scientific knowhow and orientation in the area of the emerging technologies for utilization of natural resources for sustainable development to the readers The book includes production of energy and lifesaving drugs using natural resources as well as reduction of wastage of resources like water and energy for sustainable development in both technological as well as modeling aspects **The Statesman's Yearbook 2024**

and Crop Productivity Tajinder Kaur,Saroj Arora,2021-05-06 The knowledge of plant responses to various abiotic stresses is crucial to understand their underlying mechanisms as well as the methods to develop new varieties of crops which are better suited to the environment they are grown in Environmental Stress Physiology of Plants and Crop Productivity provides readers a timely update on the knowledge about plant responses to a variety of stresses such as salinity temperature drought oxidative stress and mineral deficiencies Chapters focus on biochemical mechanisms identified in plants crucial to adapting to specific abiotic stressors along with the methods of improving plant tolerance The book also sheds light on plant secondary metabolites such as phenylpropanoids and plant growth regulators in ameliorating the stressful conditions in plants

Additional chapters present an overview of applications of genomics proteomics and metabolomics including CRISPR CAS techniques to develop abiotic stress tolerant crops The editors have also provided detailed references for extended reading to support the information in the book Environmental Stress Physiology of Plants and Crop Productivity is an informative reference for scholars and researchers working in the field of botany agriculture crop science and physiology soil science and environmental sciences *Plant Hormones* Christophe Hano,2022-05-25 Plant hormones are among the most essential

biochemicals found in plants Since Charles and Francis Darwin identified auxin action several plant hormones have been discovered These small signaling molecules regulate not only developmental and growth activities but also stress responses throughout the plant s life cycle This book discusses recent advances new perspectives and applications of plant hormones It is a useful resource for academics scientists students and industry professionals **The Statesman's Yearbook 2017**
