Universality and Variation Zoltan Kövecses, Réka Benczes, Veronika Szelid, 2024-11-04 Anger is one of the basic emotions of human emotional experience informing and guiding many of our choices and actions Although it has received considerable scholarly attention in a number of disciplines including linguistics a basic question has still remained unresolved why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why It also investigates the role that metonymies might play in the emergence of anger related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience language and the larger cultural context Including the Excluded in South Asia Madhushree Sekher, Radu Carciumaru, 2019-10-19 This book analyses and discusses the multiple dimensions of social exclusion inclusion seen in South Asia It not only captures how social exclusion is intrinsic to deprivation or deprivation in itself but also the processes of political engagement and social interactions that the socially excluded develop as strategies and networks for their advancement Consequently the book goes beyond structures or agency and examines the question of a more dynamic approach to provide spaces for the socially excluded to self manage exclusion thereby raising discussions around the contested positions that underlie development discourse on social inequality While social exclusion linked to identities is studied the book argues that hierarchies and inequalities based on social identities cut

across and affect various groups of excluded. Consequently these phenomena create or lead to various processes of exclusion. The book illustrates that social exclusion should not be limited to privileging the differences that characterize the exclusionary processes but should also comprise underpinning strategies of inclusion emphasizing the need to focus on imperatives to include. As a result the book acknowledges that social exclusion is not limited to analyzing the different identities that face exclusion but also understanding the systems and processes that create social exclusion or create opportunities for inclusion of the excluded. The book addresses readership across academic disciplines including in the growing field of state capacity and governance and practitioners administrators and policy making communities. Conclusively the book provides a platform to intensively exchange the multifaceted and critical issue of social exclusion inclusion and thus contributes to inclusive sustainable development discourse.
