

Oven door

⚠ WARNING

Do not allow moisture to enter the door or contact the door gasket during cleaning. Moisture entering the door assembly and/or getting on the door gasket will damage the gasket.

The oven door has multiple surfaces that require different cleaning techniques. The gasket on the inside surface of the oven door should never be cleaned or moved to clean other surfaces. The gasket is made of woven material which is essential for a good heat seal.

The inside door surface outside of the gasket should be cleaned by hand with hot, soapy water and a soapy plastic scouring pad. Rinse and dry thoroughly with a clean, soft cloth. Do not get the gasket wet or allow moisture to get inside the door assembly.

The inside door surface inside of the gasket and the inside door glass are cleaned during the oven's self-cleaning cycle.

The outside door surface is stainless steel and should be cleaned using the instructions on page 60.

The outside glass surface can be cleaned with glass cleaner or warm, soapy water with a thorough rinse. Do not let moisture get inside of the door assembly.

Care and cleaning of the cooktop

Surface burner controls

1. Make sure all surface burner knobs are in the OFF position.
2. Pull the control knobs straight off the surface burner control valve stems.

⚠ CAUTION

Do not clean the control knobs in a dishwasher. They are not dishwasher-safe.

3. Clean the control knobs in warm, soapy water. Rinse and completely dry all surfaces (including back and stem holes).

⚠ WARNING

Do not use spray cleaners on the surface burner control panel. Spray entering the valve holes could contact electrical components resulting in death, personal injury, or product damage.

4. Clean stainless steel surfaces with stainless steel cleaner on a damp, soft cloth. See page 60.

Samsung Range User Manual
