Abstract—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary middle-aged men. The subjects were randomly assigned to a control group (CON) and an exercise group (EX). The EX group performed a 10-week training program consisting of three sessions per week. The HR and HRR were measured at rest and during submaximal and maximal exercise at baseline and after 10 weeks. The EX group showed a significant decrease in HR at rest and during submaximal and maximal exercise compared to the CON group. The HRR also showed a significant increase in the EX group compared to the CON group. The results of this study suggest that a 10-week training program can improve the HR and HRR of sedentary middle-aged men.

When you install your T-Value One Connection, improper installation of all four screws (50 combinations for One Connection) will void the warranty. Please, before installing, refer to the correct installation instructions. Failure to maintain proper ventilation may result in a serious problem with the product.

Careless Spilling, pushing, or climbing on the Tivvy causes the Tivvy to fall, putting the entire assembly back into the mold for a new installation. The 15-second delay between Tivvy's tip-over and falling helps protect its built-in sensors and safety components, preventing the Tivvy from installing before it is in the correct position, and safely, securely, and/or consistently install itself. Spilling, pushing, or climbing on the Tivvy will prevent the Tivvy from falling.

Others go so far as to think that the U.S. is a "superpower" and, as such, has the right to intervene in the affairs of other nations. But the U.S. is not a "superpower" in the sense that it has the right to intervene in the affairs of other nations. The U.S. is a "superpower" in the sense that it has the power to influence the affairs of other nations.
