growth of Symbian in recent years and developing software for new generation wireless devices requires knowledge and experience of OS concepts This book will use many comparisons between Symbian OS and other OSes to help in that transition Get yourself ahead with the perfect introduction to developing software for Symbian OS *Transactions on Data Hiding and Multimedia Security* X Yun Q. Shi, 2015-04-16 Since the mid 1990s data hiding has been proposed as an enabling technology for securing multimedia communication and is now used in various applications including broadcast monitoring movie fingerprinting steganography video indexing and retrieval and image authentication Data hiding and cryptographic techniques are often combined to complement each other thus triggering the development of a new research field of multimedia security Besides two related disciplines steganalysis and data forensics are increasingly attracting researchers and becoming another new research field of multimedia security This journal LNCS Transactions on Data Hiding and Multimedia Security aims to be a forum for all researchers in these emerging fields publishing both original and archival research results The six papers included in this issue deal with watermarking security perceptual image hashing infrared hiding steganography and steganalysis *LTE Signaling* Ralf Kreher, Karsten Gaenger, 2016-01-19 This extensively updated second edition of LTE Signaling Troubleshooting and Performance Measurement describes the LTE signaling protocols and procedures for the third generation of mobile communications and beyond It is one of the few books available that explain the LTE signaling messages procedures and measurements down to the bit engineers technicians network planners developers researchers designers testing personnel and project managers consulting and training companies standardization bodies *Rare Earth Elements* Volker Zepf, 2013-02-14 This thesis deals with Rare Earth Elements REE especially with neodymium used in permanent magnets from a very scientific basis by providing basic research data Despite the fact that REE are newsworthy and very important elements for a considerable bandwidth of today's technologies accompanied by the monopolistic supply situation and Chinese politics there are inexplicable data discrepancies about REE which have been recognized frequently but usually have not been addressed accordingly So this analysis started with the hypothesis that the four application areas namely computer hard disk drives HDD mobile phones wind turbines and e mobility automotive traction account for about 80% of the global annual neodymium demand The research methodology was a laboratory analysis of the composition of used magnets for HDDs and mobile phones and a literature and official report analysis of wind turbine and automotive neodymium use The result was amazing and the hypothesis had to be withdrawn as these four areas only account for about 20% of neodymium use This result raises some questions concerning actual use and thus potential recycling options *Mobiles magazine*, 2005-05 Mobiles magazine est depuis 1997 le magazine de référence en langue française sur les téléphones mobiles avec plus de 15 000 pages publiées et 1 000 tests de produits depuis le n°1 Tous les mois Mobiles magazine décrypte les tendances teste les nouveaux modèles et apporte ses lecteurs le meilleur des informations pratiques pour être à la pointe des usages et produits mobiles *The PC and Gadget Help Desk* Mark Edward
