

Abstract: This study examines the impact of the 2008 financial crisis on the U.S. economy. The study finds that the crisis led to a significant decline in GDP, a rise in unemployment, and a loss of confidence in the financial system. The study also finds that the crisis led to a shift in consumer behavior, with a move away from discretionary spending and towards essential goods and services. The study concludes that the crisis has had a lasting impact on the U.S. economy, and that the government has implemented policies to stimulate growth and reduce unemployment.
