Precise Chemical Application Technology for Horticultural Crops Xiaolan Lv, Andreas Herbst, Jianli Song, Xue Li, 2024-06-03 Plant chemical protection uses professional spraying machines to transport chemicals such as pesticides and herbicides to the target sites for pest disease and weed control in crop production Such practices play a vital role in ensuring the supply of food fruits and vegetables for human beings However traditional plant chemical application methods suffer from excessive pesticide use low utilization rate and high labor intensity due to the backwardness of the existing sprayers the single atomization technology

etc In order to boost the progress of modern agriculture plant chemical protection should be oriented toward efficient accurate and intelligent application technologies and equipment Smart chemical application technology and efficient equipment can effectively reduce pesticide usage mitigate the harm of chemicals to the environment and lower labor intensity realizing the sustainable development of disease and pest control of horticultural crops ensuring food safety and maintaining crop yield and quality

Illusions of Location Theory: Consequences for Blue

Economy in Africa Francis Onditi, Douglas Yates, 2021-01-05 Illusions of Location Theory Consequences for Blue Economy in Africa questions the relevance of location theory in explaining the coastal hinterland continuum and the implications for the utilization of blue economy ecosystem in such a contested space in Africa It pays more attention to territorial contestations maritime disputes vulnerabilities of landlocked states and expansionist policies as displayed through spatial organizational regimes These areas of investigation have previously been largely studied from the narrow perspective of location unduly focusing on comparative advantages of distance while neglecting the influence of forces such as technology ideology and the power of mental mapping in spatial decision making This volume puts forward the argument that the harmonious relationship between states and efficient exploitation of the blue economy ecosystem in ways that promote peace between states lies not only in the structural transformation of markets but also in bridging the spatial and social divide between the coastal and hinterland societies Thus this work proffers possibilities for a holistic regime for managing Africa s coastal hinterland continuum through innovative strategies such as SMART blue economies and the infusion of the geopolitical dimension into the management of maritime and territorial diplomacy The combination of theoretical and empirical analysis buttressed by in depth case studies of what works in the management of blue economy ecosystem and what does not work make this volume ideal for researchers students and practitioners interested in African regional studies African political economy political geography strategic military studies governance of seas and oceans and maritime science diplomacy
