Confronting Hunger in the USA Adam M. Pine,2016-07-01 Food insecurity in the US is a critical issue that is experienced by approximately 15% of the population each year Hunger is not caused by an inability to produce enough food for the population but is instead a manifestation of federal agricultural policies that support the overproduction of commodity crops and neoliberal social policies that seek to lower the amount of benefits dispersed to those in need This book focuses on how four different food based community programs

address both the physical sensation of hunger as well as the political and economic disempowerment that work against the ability of people experiencing food insecurity to mobilize as a political force Confronting Hunger in the USA argues that most food programs do more to create community among their volunteers than among program participants and tend to reinforce neoliberal understandings of citizenship Community food programs reach out to the most vulnerable members of society in caring and gentle ways and often use the language of alternative economies to articulate a different relationship between the individual and the state However the projects in this study act as individual pieces of the state s insufficient social safety net and are only beginning to articulate a new relationship between food and society Parliamentary Debates (Hansard). Algal Biorefineries Aleš Prokop, Rakesh K. Bajpai, Mark E. Zappi, 2015-10-19 Algae offer potential to produce renewable chemicals and fuels using solar energy and carbon dioxide from atmosphere or in flue gases while simultaneously reducing the generation of greenhouse gases Since these can be grown on marginal lands with micronutrients and macronutrients often present in waste streams algae based chemicals and fuels do not compete with foods Still large scale production of algae based fuels and chemicals faces considerable technological and economical challenges and it would by necessity require a biorefinery approach wherein all the possible algal components are converted into value added compounds The present series on algal biorefineries represents a forum for reporting the state of the art of different technologies as well as the latest advances in this field The

volume II of this series complements the volume I in terms of the current state of the art Different chapters in this volume address diverse issues ranging from genetically modifies algae to new products to life cycle analysis of algal products

Shields, 2020-09-29 Why did hundreds of Democratic strongholds break for Donald Trump in 2016 and stay loyal to him in 2020 Looking for answers Muravchik and Shields lived in three such flipped communities There they discovered a political culture that was Trumpy long before the 45th president arrived on the national political scene In these places dominated by the white working class some of the most beloved and longest serving Democratic leaders are themselves Trumpian grandiose combative thin skinned and nepotistic Indifferent to ideology they promise to take care of their people by cutting deals and corners if needed Stressing loyalty they often turn to family to fill critical political roles Trump resembling these old style Democratic bosses strikes a familiar and appealing figure in these communities Although voters in flipped communities have often been portrayed as white supremacists Muravchik and Shields find that their primary political allegiances are to place not race They will spend an extra dollar to patronize local businesses and they think local jobs should go to their neighbors not foreigners from neighboring counties who are just as likely to be white and native born Unlike the Proud Boys they take more pride in their local communities than in their skin color Trump successfully courted these Democrats by promising to revitalize their struggling hometowns Because these communities largely stuck with Trump in 2020 Biden won the presidency by just the

thinnest of margins Whether they will continue to support a Republican Party without Trump or swing back to the Democrats depends in part on which party can satisfy these locally grown political tastes and values The party that does that will enjoy a stranglehold in national elections for years to come
