Kiras,2024-10-24 Special Operations Success establishes a new benchmark in military theory in this deeply analytic and innovative work It answers several pressing questions How successful have American special operations been over the past quarter century Are special forces fated to cycles of expansion and misuse Will special forces invariably exceed the authorities granted to them because of they are Is a general theory of special operations feasible given the range of activities and conditions that fall under the category Kiras work is based on two decades of practical teaching and consulting experience within different special operations communities and its analysis and conclusions are designed to inform practitioners policymakers educators and the general public The book develops a framework in the form of a theory comprising capabilities and control for the comprehensively evaluating special operations success and is divided into three parts Part I lays the foundation for a general theory of special operations Part II explores the two component parts of theory capabilities and control and Part III uses various aspects of the theory depending on available information to assess the success of special operations over a twenty year period in the United Kingdom South Africa and the United States The South China Sea Arbitration Alfredo C. Robles,2019-01-01 The South China Sea Arbitration which marks the first time that the Philippines and China have been parties to a compulsory dispute settlement procedure is a landmark legal case The Tribunal tackled head on critical issues in the interpretation and application of the UN Convention on the Law of the Sea that other international courts have failed to address particularly the compatibility of historic rights with the Convention the identification of maritime features as permanently submerged or above water at high tide and the distinction between features that are fully entitled to maritime zones and those that are not In addition the Tribunal also had to decide on issues as diverse as near collisions at sea illegal fishing of giant clams and sea turtles and the destruction of fragile coral reefs resulting from island building The Tribunals task was rendered arduous by Chinas refusal to appear before it In these circumstances understanding the Tribunals decisions is a challenging undertaking Chinas public relations campaign targeting the proceedings raised issues that the layperson could readily grasp notably African states support for its non appearance the integrity of the judges and the validity of arbitral awards Understanding the Awards and Debating with China aims to facilitate understanding of the South China Sea Arbitration by presenting detailed summaries of the two Arbitral Awards The author rebuts the questionable claims raised by Chinas public relations campaign and highlights Chinas covert actions during the proceedings Incomplete Secession after Unresolved Conflicts Ana Maria Albulescu,2021-10-20 This book analyses cases of incomplete secession after separatist wars and what this means for relations between central

governments and de facto states The work explores the interplay between violence and power by examining the micro dynamics inherent in the process of escalation between separatists and central governments These dynamics affect not only the security interactions between these entities but also the character of political and governance relations that are built in the aftermath of secessionist war The book provides comprehensive analyses of the evolution of post conflict relations between the Republic of Moldova and Transnistria and between Georgia and South Ossetia and Abkhazia Beyond these empirical and conceptual examples the book contributes to a key debate in International Relations that addresses the relationship between democratisation nationalism and violence and its applicability to the study of escalation in the post Soviet space This book will be of much interest to students of secession statehood conflict studies democratisation post Soviet politics and International Relations in general Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

their research *Anarchism* Benjamin Franks,Nathan Jun,Leonard Williams,2018-03-14 Anarchism is by far the least broadly understood ideology and the least studied academically Though highly influential both historically and in terms of recent social movements anarchism is regularly dismissed Anarchism A Conceptual Approach is a welcome addition to this growing field which is widely debated but poorly understood Occupying a distinctive position in the study of anarchist ideology this volume authored by a handpicked group of established and rising scholars investigates how anarchists often seek to sharpen their message and struggle to determine what ideas and actions are central to their identity Moving beyond defining anarchism as simply an ideology or political theory this book examines the meanings of its key concepts which have been divided into three categories Core Adjacent and Peripheral concepts Each chapter focuses on one important concept shows how anarchists have understood the concept and highlights its relationships to other concepts Although anarchism is often thought of as a political topic the interdisciplinary nature of Anarchism A Conceptual Approach makes it of interest to students and scholars across the social sciences liberal arts and the humanities **COVID-19 in Zimbabwe** Lazarus Chapungu,David Chikodzi,Kaitano Dube,2023-01-01 This contributed volume based on papers presented at a conference held in Zimbabwe in mid 2021 interrogates solutions to COVID 19 related problems and issues across agricultural environmental and water sectors in Zimbabwe and assesses their scientific economic and practical validity Across 19 chapters this volume unpacks the science economics and politics of the pandemic with a focus on understanding its secondary and tertiary impact on Zimbabwe s population The volume is also dedicated to understanding the practical and policy oriented approaches in tackling the pandemic and confronting the new normal of COVID 19 It brings together researchers development practitioners and policy makers from various disciplines in an endeavour to understand COVID 19 trends and analyse the scientific options for mitigation containment innovation and ultimately pre empt the possible emergence and impacts of other pandemics in the future *The Collapse Frequency of Structures* Dirk Proske,2022-05-12 The mathematical verification of the safety of structures can be done by determining the probability of failure or by using safety elements Observed damages and collapses are usually assessed within the framework of expert reports which seems reasonable due to the large number of unique structures in the construction industry However there should also be an examination of observed safety across all structures Therefore in this book the collapse frequencies are determined for different types of structures such as bridges dams tunnels retaining structures and buildings The collapse frequency like the failure probability belongs to stochasticity Therefore the observed mean collapse frequencies and the calculated mean failure probabilities are compared This comparison shows that the collapse frequencies are usually lower than the calculated failure probabilities In addition core damage frequencies and probabilities are given to extend the comparison to another technical product *Border Jumping and Migration Control in Southern Africa* Francis Musoni,2020-04-07 With the end of apartheid rule in South Africa and the ongoing economic crisis in Zimbabwe the border between these Southern African countries has become one of the busiest inland ports of entry in the

world As border crossers wait for clearance crime violence and illegal entries have become rampant Francis Musoni observes that border jumping has become a way of life for many of those who live on both sides of the Limpopo River and he explores the reasons for this including searches for better paying jobs and access to food and clothing at affordable prices Musoni sets these actions into a framework of illegality He considers how countries have failed to secure their borders why passports are denied to travelers and how border jumping has become a phenomenon with a long history especially in Africa Musoni emphasizes cross border travelers active participation in the making of this history and how clandestine mobility has presented opportunity and creative possibilities for those who are willing to take the risk
