inclusion and exclusion within local communities While most literature focuses on crop booms for food and biofuel production the industrial plantation sector has largely been overlooked despite it being one of the biggest sectors in the current rush for land Filling this lacuna this book also reveals that while China has traditionally been painted as a major land grabber and consumer of crop booms it is also a destination of foreign investment In doing so the book highlights how large scale foreign land deals can also take place in traditional grabber countries like China which feeds into the wider debates about global land politics and resource grabbing This book will be of great interest to students and scholars of land grabbing rural development and agrarian transformations as well as Chinese development
