linguistics **Constructional Approaches to Syntactic Structures in German** Hans C. Boas, Alexander Ziem, 2018-07-09

The volume is unique in that it offers an easily accessible yet comprehensive and sophisticated variety of papers. Moreover, various of the papers make explicit connections between grammatical constructions and the concept of valency, which has figured quite prominently in Germanic Linguistics over the past half century. **The Dynamics of Linguistic Variation** Terttu

prominently in Germanic Linguistics over the past half century **The Dynamics of Linguistic Variation** Terttu Nevalainen, Irma Taavitsainen, Päivi Pahta, Minna Korhonen, 2008-12-03 Variability is characteristic of any living language. This volume approaches the life cycle of linguistic variability in English using data sources that range from electronic corpora to the internet. In the spirit of the 1968 Weinreich Labov and Herzog classic, the fifteen contributions divide into three sections, each highlighting different stages in the dynamics of English across time and space. They show first how increase in variability can be initiated by processes that give rise to new patterns of discourse which can ultimately crystallize into new grammatical elements. The next phase is the spread of linguistic features and patterns of discourse both new and well established through the social and regional varieties of English. The final phase in this ebb and flow of linguistic variability consists of processes promoting some variable features over others across registers and regional and social varieties, thus resulting in reduced variation and increased linguistic homogeneity Grammar and Dialogism Susanne

Günthner, Wolfgang Imo, Jörg Bücken, 2014-10-29 This volume aims at analyzing the relationship between the dialogical

accomplishment of spoken talk in interaction on the one hand and entrenched patterns of linguistic and socio cultural knowledge constructions frames and communicative genres on the other The contributions analyze linguistic patterns in different languages such as English French German and Swedish Methodologically they take up the usage based position that structural and functional aspects of language use need to be studied empirically and bottom up Since grammatical structure arises as the entrenched result of recurrent language use its study should start with the local organization of natural talk in interaction before moving on to more complex and abstract relationships between linguistic structure linguistic meaning and socio cultural activity event patterns Furthermore they argue that Dialogism provides a promising starting point for a usage based approach to linguistic patterns as both emerging i e constructed in response to the situational circumstances of talk in interaction and emergent i e constructed with regard to symbolic units as parts of socially and culturally shared knowledge
