Miriam Kate McDonald

Safe Planet Renewable Energy Plus Workers Power John Cowsill:

Safe Planet: John Cowsill,2014-09-26 What is the greatest challenge facing humanity this century The answer is how we can produce the energy and resources we need without endangering the future of human life on the planet And yet there aren't many books which present technical and political strategies for a rapid progress towards a safe planet one powered by clean renewable energy alone This is a real pity because many intelligent people would love to read a book on this subject SAFE PLANET is the first book to describe a road map towards a new world a safe planet It combines meteorological data and existing tried and tested technologies and it tackles the sticky problem of the existing global political and economic power structures This optimistic book is a rallying cry for all those concerned about what the future holds for their children If you are worried about your energy bills and the price of fuel about the prospect of the lights going out if you want to stop the environmental pollution and the alarming rate of species extinction if you are against fracking if you are for a cleaner better transport and energy infrastructure if you are sick of the rich getting ever richer at the expense of the rest of us this compelling and clear narrative about the crisis and its solution is for you Emergent Miriam Kate McDonald,2022-11-25 In

Emergent Miriam McDonald explores the relationships that bind our world together It is by reintegrating lost species with historic ranges that rewilding reignites the miraculous dance of life across landscapes It is through reforming severed relationships that regenerative farmers build soil produce nutrient dense food and foster a renewed sense of kinship and community And it is by reweaving our lives with those of the wild that we can restore our earth and ourselves Regenerative agriculture and rewilding grow from the same root but appear as separate entities to our unaccustomed eyes divided by how we view ourselves within or banish ourselves from the land Emergent delves into this divide to explore the fascinating story of our exclusion from the wild and the scientific discovery of our interdependence with it Above all Emergent gives us a reason to be hopeful To embrace all that humanity is and can be as an amazingly beneficial force in a complex and connected world Rise Up - with Wings Like Eagles Chris Sunderland,2016-12-09 At a time of great importance in the history of life

on the planet human beings find themselves with enormous economic and technological power but also with a terrible inner weakness This book takes a careful look at our vulnerability and proposes some radical new pathways towards a life more in harmony with the natural world **The Saviour Fish** Mark Weston,2022-04-29 Mark Weston's book is a delight From

charming neighbourhood children to failing fish stocks not forgetting the perfect recipe for banana beer **The Saviour Fish** is a compelling account of life on a remote Tanzanian island told by a writer who has his eyes wide open and his heart fully engaged James Copnall Presenter Newsday BBC World Service and author of *A Poisonous Thorn in our Hearts* Sudan and South Sudan's Bitter and Incomplete Divorce Sent to live on a remote island in the Tanzanian half of Lake Victoria Mark Weston finds a community grappling with one of the world's great unknown environmental crises You used to be able to stand on the beach and fish In my father's time you could catch them with your bare hands Lake Victoria was once one of the

most biodiverse places on Earth but a predator released into its waters by East Africa's British colonisers has left a trail of destruction in its wake. The lives of millions of people have been upended as a fateful confluence of overfishing, pollution and deforestation has triggered one of history's greatest mass extinctions. On remote Ukerewe Island, Mark Weston finds out how local communities are responding to the crisis. He lives for two years alongside the families and fishermen hardest hit by the upheaval and gets to know the aid workers, sorcerers and holy men whose businesses are booming. A captivating blend of travel writing and environmental reportage, *The Saviour Fish* paints an intimate picture of rural Tanzanian life and of the human cost of biodiversity loss.

Sustainable Electricity II Jessica Fox, Morgan Scott, 2018-10-22

Realities of power company choices, regulatory boundaries and stakeholder approvals. Expectations of the responsible investor, environmental advocate and Silicon Valley companies including Google, Facebook and Stanford University. Surprising stories show how creativity, innovation and planning can resolve some of the toughest choices facing electric power companies today, although not in all cases. Building on the first volume, *Sustainable Electricity Case Studies from Electric Power Companies in North America*, Fox 2016, Springer, this book dives headfirst into the economic, environmental and social tradeoffs power companies face as they strive to be sustainable. With more than 40 contributing experts, chapters include first-hand power company stories, case studies of leading Silicon Valley organizations, socially responsible investor contemplations, environmental advocacy arguments and regulatory realities. The book provides a window into the choices companies make, the tradeoffs stakeholders accept and the bottom line that comes with producing sustainable electricity. It will be an important resource that will accelerate collective thoughts on what sustainable electricity means and what needs to be considered when the everyone wins outcome is elusive. People have been able to fish, hike, camp and boat on a beautiful AEP property that supports recreational activities for many years. Now AEP has to generate income from this property. Do we build roads and drill to extract the natural gas? Do we sell the timber and keep the property? Do we sell the whole thing? What about the fish, deer and other wildlife? Tradeoffs will be made and not everyone will like them. Tim W. Lohner, Ph.D., Environmental Specialist, American Electric Power. Chapter 3: Companies are demanding access to clean energy and investors are pressing companies to source 100% renewable. It is essential that utilities develop a comprehensive strategy to reduce climate impact and clearly articulate the plan and their progress. Customers and investors want to see this progress and utilities need to develop the right model for their particular business. John Streur, CEO, Calvert Research Management. Chapter 4: At Chevron, we are continually examining the tradeoffs as we work to improve our energy efficiency and reduce our environmental footprint. The complexity of our global shared challenge to electrify the world without undue compromise to the integrity of our planet is one that will require global action. The experiences and perspectives detailed in this book are important to understand as we collectively work towards a sustainable energy future. The one billion plus are counting on us. Kirsten S. Thorne, Global Issues and Public Policy Manager, Chevron Forward.
