Wieringen,2025-09-29 What makes a good teacher From Socrates to John Dewey educators have long sought to define the essence of teaching and learning Yet one rich tradition often overlooked in these discussions is the biblical tradition In *Models of the Teacher in Biblical Texts and Their Reception* readers are invited to explore a vibrant tapestry of biblical figures and texts that have shaped challenged and inspired generations of learners This volume offers a unique series of encounters with biblical teachers and those who have engaged with their teachings throughout history Considering a wide array of roles lecturer writer pastor or even an imaginative medium like a computer game the book presents a colorful palette of teaching models These diverse approaches not only reflect the dynamic nature of education but also offer enduring inspiration for educators and learners today **Saint Paul** Béda Rigaux,1956 *The Priest Barracks* Guillaume

Université catholique de Louvain (1835-1969),1904 **Singularity** Samuel Weber,2021-05-25 An influential thinker on the concept of singularity and its implications on politics theology economics psychoanalysis and literature For readers versed in critical theory German and comparative literature or media studies a new book by Samuel Weber is essential reading *Singularity* is no exception Bringing together two decades of his essays it hones in on the surprising implications of the singular and its historical relation to the individual in politics theology economics psychoanalysis and literature Although singularity has long been a keyword in literary studies and philosophy never has it been explored as in this book which distinguishes singularity as an aporetic notion from individuality with which it remains historically closely tied To speak or write of the singular is problematic Weber argues since once it is spoken of it is no longer strictly singular Walter Benjamin observed that singularity and repetition imply each other This approach informs the essays in *Singularity* Weber notes that what

distinguishes the singular from the individual is that it cannot be perceived directly but rather experienced through feelings that depend on but also exceed cognition This interdependence of cognition and affect plays itself out in politics economics and theology as well as in poetics Political practice as well as its theory have been dominated by the attempt to domesticate singularity by subordinating it to the notion of individuality Weber suggests that this political tendency draws support from what he calls the monotheological identity paradigm deriving from the idea of a unique and exclusive Creator God Despite the secular tendencies usually associated with Western modernity this paradigm continues today to inform and influence political and economic practices often displaying self destructive tendencies By contrast Weber reads the literary writings of Hlderlin Nietzsche and Kafka as exemplary practices that put singularity into play not as fiction but as friction exposing the self evidence of established conventions to be responses to challenges and problems that they often prefer to obscure or ignore **Le Nouveau Testament de N.S.
