As a pupil societal worker, I was required to finish a Child observation over a period of six hebdomads. In order to fix I had to make up one's mind the kid and household I wanted to detect, on this juncture I decided I would detect a kid from a assorted race back land of age 0-12 months. The kid I observed was 12 months from a individual parent household and had three older siblings, the observation took topographic point at her place after I acquired consent from the female parent I started my undertaking. It was indispensable to understand what observation was and I determined that it is an informed manner of sing or looking at something that raises consciousness and increases apprehension.

At the start of the observation I felt really uncomfortable being in unfamiliar district, I felt that it was unjust for me to subject this household to my ain values, rules and bias. Although I felt that my chosen environment in which to detect was the right one, I had great concerns of my deficiency of experience and how the household would react to me as an foreigner in their lives. I was besides really dying about how this procedure would impact me as a parent and my parenting accomplishments or deficiency of it was an intense minute. I questioned whether my function as an perceiver was truly necessary but I had to acquire apprehension of what observation was and meant to me. Trevithick (2012, pg: 169) stated "œ that we learn a batch by detecting others and as such learn what is being transmitted through tone of voice, volume, modulation, position and gestures. "œ

Parent Child Observation Report

As I observed the kid I realised that I learnt a great trade non merely as an perceiver but as a female parent and contemplation on my ain childhood, upbringing and old occupation function. There was a great trade of idea about the emotional impact of the observation on myself as the perceiver. First I learnt the importance of observation, I realised that it was really indispensable to watch and listen than to talk because a great trade is achieved by watching, listening and being soundless. Baldwin (1994, pg 83) stated through observation one is "œ hearing and valuing the voice of the ascertained "œ, and I believed that without words being said there was a connexion between the kid and I. (ability to stay degage to suspend opinion and chorus from engagement, being cognizant of feelings and attitudes evoked, non originating interaction, Precise entering which distinguishes what really happened from what reading.

Second I learnt that observation is a accomplishment that is learnt and acquired with preparation and pattern. Before this undertaking as a household support worker I was required to detect peop

Children's Bureau). no. 179, 1927 ,1927* Increased bicycle helmet use in Sweden: needs and possibilities Sixten Nolén,2017-08-21 Background From the perspective of what is called vision zero in Sweden fatalities and injuries among bicyclists are unacceptable Despite that bicyclists constitutes approximately one third of all road user inpatients in Swedish hospitals which is about the same proportion seen for drivers and passengers of motor vehicles There are too many bicycle related head injuries but the risk of such traumas could be reduced considerably by the use of helmets Bicycle helmet wearing can be increased by voluntary means for instance by long term community based helmet promotion programs However the best effect has been achieved by combining promotion with a compulsory helmet law for all bicyclists as has been done in Australia New Zealand and North America Aim The general aim of the research underlying this dissertation was to provide further information about the need for increased bicycle helmet use in Sweden and to determine what measures can lead to more widespread helmet wearing The four papers included addressed two main questions 1 What is the need for increased helmet wearing among different categories of bicyclists in Sweden 2 Is a non compulsory local bicycle helmet law a realistic alternative to a mandatory helmet law for all bicyclists Materials and methods Observational studies of helmet use by bicyclists in Sweden were conducted once a year average n 37 031 year during the period 1988 2002 paper I The general trend in observed helmet wearing in different categories of bicyclists was analyzed by linear regression and the results were used to predict future trends in helmet wearing Three studies papers II IV were also performed to evaluate a non compulsory local bicycle helmet law in Motala municipality during the study period 1995 to 1998 papers II IV This law was introduced in 1996 and applies specifically to school children ages 6 12 years although the intention is to increase helmet use among all bicyclists Adoption of the law was accompanied by helmet promotion activities In one of the studies in the evaluation written material and in depth interviews n 8 were analyzed qualitatively to describe the process and structure of development of the Motala helmet law The other two studies used a quasi experimental design to assess the impact of the helmet law one comprised annual observations of helmet wearing among bicyclists in Motala average n 2 458 year and control areas average n 17 818 year and the other included

questionnaire data on attitudes beliefs and self reported behavior of school children in Motala n 1 277 and control areas n 2 198 The average response rate was 72.8% Results and discussion There was a significant upward trend in helmet use in all categories of bicyclists from 1988 to 2002 Helmet wearing increased from 20% to 35% among children 10 years riding bikes in their leisure time from 5% to 33% among school children and from 2% to 14% in adults Total average helmet use rose from 4% to 17% However during the last five years of the study period 1998-2002 there was no upward trend in helmet wearing for any of the categories of bicyclists If the historic trend in helmet use continues the average wearing rate will be about 30% by the year 2010 The Motala helmet law was dogged by several problems mainly during the initiation phase and some of them led to poor rooting of the law in the schools and indistinct roles and responsibilities of the municipal actors Despite that the law initially led to a significant increase in helmet wearing among the primary target group school children from a pre law level of 65% to about 76% six months post law whereas thereafter the wearing rate gradually decreased and was at the pre law level 2 years after the law was adopted Nonetheless a weak but significant effect on adult bicyclists remained the pre law level of about 2% rose to about 8% at the end of the study period Only about 10% of bicyclists on bike paths in Motala wore helmets 2 years post law The questionnaire study showed one significant effect on school children in Motala two years post law namely a stronger intention to ride bicycles if a national compulsory helmet law was introduced There was however no significant long term influence on children's attitudes or beliefs about helmet wearing which agrees with the results of the observational study General conclusions It is indeed necessary to increase bicycle helmet wearing in Sweden Both the current average rate of helmet use and the rate predicted for the near future are far from the goal of 80% that was officially proposed by several years ago Previous research has shown that to achieve substantial and sustained bicycle helmet use it is necessary to use helmet promotion in combination with a national helmet law that is compulsory and applies to all bicyclists The present evaluation of the non compulsory local helmet law in Motala indicated that this type of initiative is not a powerful alternative to a mandatory national helmet law Nevertheless much has been learned from the initiation and implementation of this local action
