Place-Based Development Economics and Policy Gilberto Seravalli,2015-02-11 This book introduces the reader to local development economics and policy with a special focus on the place based paradigm that covers its justification its difficulties and the types of public intervention that it suggests The starting point for the analysis is that economic development in lagging places is not to be expected as the result of a mechanism of automatic convergence between backward and advanced regions and that therefore the most appropriate development policy is not to maximize competition among all agents in all sectors and places The failure of the Washington Consensus is examined and the two competing positions to have emerged from this failure spatially blind interventions and place based policies are contrasted The main shortcoming of spatially blind policies namely that immobile resources that could trigger or support a development process often remain untapped or trapped is emphasized The limitations of the big push state intervention and wage flexibility solutions to this trap are analyzed and the merits of place based policies that support intervention and can deal with uncertainty risk and conflict are discussed

The Place of God at the Bookends of the Bible David W. Larsen,2023-10-09 What if everything in the Bible has a larger outer context than is usually accounted for Missional and biblical theologies suggest that the Bible presents a grand story like a play with multiple acts The acts typically include creation fall redemption and finally restoration But what if the whole story itself occurs in another larger setting occurring within a mission running in the background throughout the whole Bible How might this aid our research reading and application And why is this being proposed now This book explores these questions The larger context is the production of the place of God a home and homeland wherein God with his people dwell on earth Since place is underdeveloped in biblical studies the book presents a new method for interpreting place Then the book lays out the case that a grand mission to produce the place of God becomes the outer context for the whole Bible Finally the book defends this proposal with an in depth placial commentary of the bookends of the Bible since these bookends provide keys to unlock this message thereby inviting further study on the rest of the Bible and on the implications for this transformative perspective Touched By This Place Valentín, Benjamín,2024-06-12 Explores the ways in which geographic

Thomas Dale Hugh Blair, 1863 Interdisciplinary Unsettlings of Place and Space Sarah Pinto, Shelley

Hannigan, Bernadette Walker-Gibbs, Emma Charlton, 2019-04-25 This book brings together researchers from different fields traditions and perspectives to examine the ways in which place and space might be unsettled Researchers from across the humanities and social sciences have been drawn to the study of place and space since the 1970s and the term unsettled has been an occasional but recurring presence in this body of scholarship Though it has been used to invoke a range of meanings from the dangerous to the liberating the term itself has rarely been at the centre of sustained examination This collection highlights the idea of the unsettled in the scholarly investigation of place and space The respective chapters offer a dialogue

between a diverse and eclectic group of researchers crossing significant disciplinary and interdisciplinary boundaries in the process. The purpose of the collection is to juxtapose a range of different approaches to and perspectives on the unsettling of place and space. In doing so, *Interdisciplinary Unsettlings of Place and Space* makes an important contribution and offers new insights into how scholarship and research into different fields and practices may help us re-envision place and space.

A History of Place in the Digital Age Stuart Dunn, 2019-02-13 *A History of Place in the Digital Age* explores the history and impact of Geographic Information Systems (GIS) and related digital mapping technologies in humanities research. Providing a historical and methodological discussion of place in the most important primary materials which make up the human record including text and artefacts, the book explains how these materials frame form and communicate location in the age of the internet. This leads in to a discussion of how the World Wide Web distorts and skews place, amplifying some voices and reducing others. Drawing on several connected case studies from the early modern period to the present day, the spatial writings of early modern antiquarians are explored as are the roots of approaches to place in archaeology and philosophy. This forms the basis for a review of place online through the complex history of the invention of the internet in to the age of the interactive web and social media. By doing so, the book explores the key themes of spatial power and representation which these technologies frame. *A History of Place in the Digital Age* will be of interest to scholars, students and practitioners in a variety of humanities disciplines with an interest in understanding how technology can help them undertake research on spatial themes. It will be of interest as primary work to historians of technology, media and communications.

Governance, Identity and Place of Graffiti Kerun Li, 2025-06-29 This book offers a comprehensive overview of graffiti culture in China, particularly through the example of graffiti in the Furong Tunnel at Xiamen University. It explores the complex relationship between graffiti as an art form and social behavior, focusing on its definition, legality, public space, conflicts, sense of place, and interactions under management systems. Firstly, the book discusses the varying definitions of graffiti in Western and Chinese contexts. Using the Furong Tunnel graffiti as a case study, it examines the line between artistic expression and vandalism, highlighting issues of legality, sense of place, and publicness. Secondly, it delves into the practice of graffiti in public spaces, particularly within Xiamen University. The graffiti in the Furong Tunnel has sparked debates about the conflict between educational and social functions, altering the tunnel's spatial form and function. It has become a focal point for conflicts between tourists and students, reflecting the complexity of campus space. The book also explores how graffiti constructs a sense of place and its associated social conflicts. By tracing the historical development of

tunnel graffiti it shows how graffiti becomes a collective memory and cultural symbol serving as a medium for students to express emotions and construct local identities Furthermore the book addresses the legality of graffiti and the negotiation among actors under management systems Although not legally considered a tourism resource the university's stance is ambiguous balancing strict regulations with using graffiti for publicity Specific incidents of vandalism highlight conflicts between graffiti culture and campus management discussing issues of protection and restoration Lastly the book examines ownership and management of graffiti Conflicts over preservation and usage rights between students and tourists show the university's role as a coordinator It emphasizes graffiti's importance in campus culture and as a promotional tool while also noting that management measures might limit free expression leading to homogenization concerns Using multiple research methods this book explores the social and political implications of graffiti emphasizing the interactions and conflicts among stakeholders It reveals the significance of graffiti in Chinese society and offers solutions to issues concerning graffiti culture in contemporary China
