In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Learning to Read the Earth and Sky Russ Colson, Mary Colson, 2016-12-01. Is it time to refresh the way you think about teaching Earth science? *Learning to Read the Earth and Sky* is the multifaceted resource you need to bring authentic science and enthusiasm into your classroom. It offers inspiration for reaching beyond prepared curricula, engaging in discovery along with your students, and using your lessons to support the Next Generation Science Standards (NGSS). The book provides examples of Earth science labs and activities you and your students can do as co-investigators, insights into student expectations and misconceptions, plus ideas for inspiring true investigation stories of real scientific discovery translated for classroom consideration, exploration of how you can mentor students as a teacher-scholar, and guidance on how to translate the sweeping core ideas of the NGSS into specific examples students can touch, see, and experience. The authors of *Learning to Read the Earth and Sky* are husband and wife educators who promote science as something to figure out, not just something to know. They write, "It is our hope that readers will find our book short on 'edu-speak' and long on the joy of doing science and full of stories of students, classrooms, scientists, and Earth and sky."
