

# 10 SIMPLE RULES FOR WRITING RESEARCH PAPERS

Asad Naveed/ [asadnaveed.com](http://asadnaveed.com)

## 1: MAKE IT A GUIDING FORCE

Design a project with an ultimate paper firmly in mind. Use writing to reassess the project, reevaluate experiment logic, and verify research results.

## 2: BE CONCISE AND OBJECTIVE

Use simple language to convey complex ideas. Avoid using jargon or technical terms that may not be familiar to your readers.

## 3: LESS IS MORE

It is often the case that more than one hypothesis or objective may be tackled in one project. The significance, completeness, and coherence of the results should be the principal guide for selecting the story to tell.

## 4: USE THE THIRD PERSON

Write in the third person to maintain objectivity and avoid personal bias.

## 5: BE SPECIFIC

State your hypothesis clearly and concisely, and explain why it is important. Define your terms precisely and provide examples where appropriate.

## 6: ACKNOWLEDGE POTENTIAL PITFALLS:

Be honest about the limitations of your research and acknowledge any potential biases or confounding factors.

## 7: AVOID REDUNDANCY

Do not repeat information that has already been presented elsewhere in the paper. Use tables and figures to present data in a clear and concise manner.

## 8: GET FEEDBACK

Seek feedback from colleagues, mentors, or other experts in your field to improve your paper.

## 9: REVISE AND REWRITE

Writing is an iterative process. Revise your paper multiple times to ensure that it is well-organized, clear, concise, and free of errors.

## 10: GIVE YOURSELF TIME

Writing a high-quality research paper takes time and effort. Plan ahead and give yourself enough time to complete each step of the process.
