Overview

The S541.RF is a radio frequency (RF) transmitter designed to function as a battery powered switch monitor for use in the INNCOM RF IRAS network. It can also be used in conjunction with virtually any "dry contact" switch input to transmit closure information to the e4 thermostat.

The RT3 (S541.RFT), a modified S541.RF, comes equipped with a temperature sensor and dispenses with the wiring harness for use as a low-cost remote battery operated temperature measurement device only.

From the foreword by world leading Lyme expert Joseph J Burrascano Jr MD A detailed and thoughtful road map is sorely needed And it is in this context that I am so pleased that we have this book by Dr Kinderlehrer I wish I d had a book like this back in the day to guide me It covers just about everything the infections diagnostic tests treatments and yes the all important terrain It gives the reader an in depth but easily understandable guide through the many subtleties of tick borne illnesses I am impressed with the knowledge presented and grateful for this information which has helped so many people recover from chronic illness To anyone touched by tick borne diseases be they a patient a caregiver loved one or health practitioner this book is a must read It will serve as a continuing reference as it gets read and reread to assimilate all it has to offer I congratulate Dr Kinderlehrer and thank him for this most impressive work The ultimate guide to recognizing coping with and overcoming chronic infection Lyme Disease is a substantial problem While the CDC reported 427 000 new cases in 2017 based on surveillance criteria actual numbers based on clinical diagnosis put that number at over one million It is now well accepted that 10 to 20 percent of these cases go on to become a chronic illness and these numbers don t even include those people who became chronically ill without ever witnessing a tick attachment or a bulls eye rash In other words hundreds of thousands of people develop a chronic illness every year This is why Dr Dan

Kinderlehrer's book is so important and timely and has the potential to help millions who are victims of this epidemic. His integrative approach offers the most up to date and comprehensive plan available for treating and beating this disease. It will discuss brand new treatments such as disulfiram which is being hailed as a major breakthrough as well as the use of cannabis to treat pain and anxiety among other developments in the field. With the staggering growth we are seeing in numbers of people afflicted this book becomes more important every day. Kinderlehrer is in a unique position to write this book. After completing a residency in Internal Medicine in 1979 he opened one of the first practices in the US in what was then called Holistic Medicine. After becoming an expert in nutrition and environmental illness he became ill himself with Lyme disease complex. His long road to recovery has given him insights into what patients are going through. His background in internal medicine trained him to understand the complexities of his multi systemic illness. His knowledge of environmental illness has enabled him to evaluate immune dysregulation and his study of energetic medicine, spiritual alignment and healing from trauma has yielded insights into how to help patients shift their belief systems to being well. Recovery from Lyme Disease is by far the most thorough book available on Lyme Disease Complex. It will provide patients with information that will guide them on their healing journeys as well as supplying doctors with instruction on appropriate diagnosis and treatment approaches.
