On the Ruins of Babel Daniel Leonhard Purdy, 2011-03-15 The eighteenth century struggled to define architecture as either an art or a science the image of the architect as a grand figure who synthesizes all other disciplines within a single master plan emerged from this discourse Immanuel Kant and Johann Wolfgang Goethe described the architect as their equal a genius with godlike creativity For writers from Descartes to Freud architectural reasoning provided a method for critically examining consciousness The architect as philosophers liked to think of him was obligated by the design and construction process to mediate between the abstract and the actual In *On the Ruins of Babel* Daniel Purdy traces this notion back to its wellspring He surveys the volatile state of architectural theory in the Enlightenment brought on by the newly emerged scientific critiques of Renaissance cosmology then shows how German writers redeployed Renaissance terminology so that harmony unity synthesis foundation and orderliness became states of consciousness rather than terms used to describe the built world Purdy's distinctly new interpretation of German theory reveals how metaphors constitute interior life as an architectural space to be designed constructed renovated or demolished He elucidates the close affinity between Hegel's Romantic aesthetic of space and Daniel Libeskind's deconstruction of monumental architecture in Berlin's Jewish Museum Through a careful reading of Walter Benjamin's writing on architecture as myth Purdy details how classical architecture shaped Benjamin's modernist interpretations of urban life particularly his elaboration on Freud's archaeology of the unconscious Benjamin's essays on dreams and architecture turn the individualist sensibility of the Enlightenment into a collective and mythic identification between humans and buildings

What to Do with Ruins? Joan Ramon

Resina, Laura Menéndez Gorina, 2025-09-01 The essays in this book explore the history of ruins in multiple cultures and periods. Authors study ways in which ruins can be appropriated, foregrounded and re-semanticized for political purposes. The links between the materiality of monuments and global processes of ruination are seldom explored as are the historicity of rubble and its museumification. Ruins are predicated on the interplay between presence and absence; they remind us of caducity while conjuring up the spectrum of the completeness that would negate them. They can awaken the eeriness of the disintegrating modern city and serve as a metaphor for institutional decay. But they can also underpin proposals of restoration through salvage and reuse of the rubble.
